Tolkien's literary artistry from the points of view of both linguistics and literary history with the aim of shedding light on the literary techniques used in *The Lord of the Rings*. The authors study Tolkien's use of words, style, narrative techniques, rhetoric, and symbolism to highlight his status as literary artist. Dirk Siepmann uses a corpus stylistic approach to analyse Tolkien's vocabulary and syntax, while Thomas Kullmann uses discourse theory, literary history, and concepts of intertextuality to explore Tolkien's literary techniques, relating them to the history of English fiction and poetry. Issues discussed include point of view, speeches, story telling, landscape descriptions, the poems inserted into the body of the narrative, and the role of language in the characterization of the novel's protagonists. This book will be of particular interest to students and scholars of literature, corpus linguistics, and stylistics, as well as Tolkien fans and specialists.
