Metaverse: Concept, Content and Context Shenghui Cheng, 2023-06-22. The metaverse, a hybrid society of the real and the virtual, is attracting significant attention from academia to industry and is starting to change the world. Composed of ten chapters, this book introduces the metaverse from three aspects: concept, content, and context. It starts with numerous concepts related to the metaverse, such as virtual reality, augmented reality, Web 3.0, and NFTs, and describes the background, features, advantages, and disadvantages. It then presents the content or key techniques around the metaverse: Artificial Intelligence, big data, edge computing, 3D modeling, and blockchain. For each technique, it depicts how it performs to advance the development of the metaverse. Finally, it gives the context of the metaverse and illustrates the new society in the virtual world, consisting of economic systems, assets, social activities, security, law, etcetera. Overall, *Metaverse: Concept, Content and Context* provides a panoramic view of the metaverse, a key feature of which is the intuitive visualizations with numerous figures that clearly address the main aspects. This book is well designed and well written and will appeal to beginners and students as well as professionals welcome to the metaverse community. *Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing* Roger Lee, 2022-11-18. This book presents scientific results of the 23rd ACIS International Summer Virtual Conference on Software Engineering, Artificial Intelligence, Networking and Parallel Distributed Computing (SNPD2022 Summer), which was held on July 4-6, 2022, at Kyoto City, Japan. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users, and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects, theory, applications, and tools of computer and information science, and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the workshop. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. From this second round of review, 15 of the most promising papers are then published in this Springer SCI book and not the conference proceedings. We impatiently await the important contributions that we know these authors will bring to the field of computer and information science. Managing and Using Information Systems Keri E.
