Science of Fasting for Healthy Body and Mind Ram Babu Sao, 2025-05-31 Fasting has been used for the body to get rid of waste buildup and also for religious and spiritual purification for centuries This book *Science of Fasting for Healthy Body and Mind* is very fascinating and an exasperating with its simplicity and its vastness Nearly every religious text from the Old and New Testaments of the Upanishads as well as Bible to the Quran calls upon followers to fast periodically as a rite of spiritual purification penitence or preparation for union with God Fasting advocates and claims that the practice can effectively treat serious health conditions like diabetes constipation arthritis and colitis to heart disease and depression In his practice he has seen fasting combined with improving the diet before and afterwards which eliminates lupus arthritis and chronic skin conditions like psoriasis and eczema He says he has also seen fasting heal the digestive tracts of those with ulcerative colitis and Crohn's disease and lower blood pressure Fasting followed by a vegetarian diet interferes with the immune system's activities especially if the immune system is overreacting as it does with and other autoimmune diseases He cites half a dozen studies published in medical journals ranging from the American Journal of Physiology Endocrinology and Metabolism to the Scandinavian Journal of Rheumatology Studies published in The Proceedings of the National Academy of Sciences and The Journal of Nutrition in 2003 showed that human beings forced to fast every other day while eating twice the normal amount of food on non fasting days had better insulin control neuronal resistance to injury and other health indicators than people fed calorie restricted diets Fasting may yield psychological benefits as well

The New Evolution Diet Arthur De Vany, 2011-12-20 Believe it or not our DNA is almost exactly the same as that of our ancestors While scientific advances in agriculture medicine and technology have protected man to some degree from dangers such as starvation illness and exposure the fact remains that our cave dwelling cousins were considerably healthier than we are Our paleolithic ancestors did not suffer from heart disease diabetes high blood pressure or obesity In fact a good deal of what we view as normal aging is a modern condition that is more akin to disease than any natural state of growing older Our predecessors were incomparably better nourished than we are and were incredibly physically fit And certainly none of them ever craved a doughnut let alone tasted one In fact the human preference for sweet tastes and fatty textures was developed in an environment where such treats were rare and signaled dense useful energy This once helpful adaptation is the downfall of many a dieter today It's what makes it hard to resist fats and sweets especially when they are all around us We are not living as we were built to live Our genes were forged in an environment where activity was mandatory you were active or you starved or were eaten This created strong selective pressure for genes encoding a smart physically adept individual capable of very high activity levels Humans are among the most active of species and we carry energetically expensive brains to boot Our energy expenditures rank high among all animals At least they once did *The New Evolution Diet* by Arthur De Vany PhD

is a roadmap back to the better health our ancestors once enjoyed By eliminating modern foods including carbohydrates dairy and all processed foods from our diets we can undo much of the damage caused by our modern food environment The plan is based on three simple principles 1 Enjoy the pleasure of food and do not count or restrict calories Eat three satisfying meals a day filled with non starchy vegetables fruits and high quality lean proteins 2 Do not starve yourself but do go hungry episodically for brief periods to promote a low fasting blood insulin level and increase metabolic fat burning 3 Exercise less not more but with more playfulness and intensity The goal is to create a strong body with a high resting metabolism and a large physiologic capacity to move through life easily not to burn calories
