Technosleep Catherine Coveney, Michael Greaney, Eric L. Hsu, Robert Meadows, Simon J. Williams, 2023-06-25. This book draws on a variety of substantive examples from science, technology, medicine, literature, and popular culture to highlight how a new technoscientifically mediated and modified phase and form of technosleep is now in the making in the global north, at least, and to discuss the consequences for our relationships to sleep, the values we accord sleep, and the very nature and normativities of sleep itself. The authors discuss how technosleep, at its simplest, denotes the coming together or entanglements of sleep and technology and sensitizes us to various shifts in sleep technology relations through culture, time, and place. In doing so, it pays close attention to the salience and significance of these trends and transformations to date in everyday night life, their implications for sleep inequalities, and the related issues of sleep and social justice they suggest.
