Basic Concepts Of Educational Science Analysis Critique Proposals:

Basic Concepts of Educational Science Wolfgang Brezinka,1994 *Encyclopedia of Educational Theory and Philosophy* D. C. Phillips,2014-06-06 The two volume Encyclopedia of Educational Theory and Philosophy introduces readers to theories that have stood the test of time and those that have provided the historical foundation for the best of contemporary educational theory and practice Drawing together a team of international scholars this invaluable reference examines the global landscape of all the key theories and the theorists behind them and presents them in the context needed to understand their strengths and weaknesses *Critical Rationalism and Educational Discourse* ,2023-09-20 Critical Rationalism has

become an influential philosophy in many areas including a great number of scientific disciplines Yet only few studies have been devoted to the role of the philosophy of Sir Karl Popper in the vast field of education This volume undertakes to fill this gap Leading scholars in the educational science and in the philosophy of education have critically written for this volume in an attempt to elaborate Popper s methodological and socio political views and confront them with a globally relevant spectrum of scientific objectives and cultural values Among the topics discussed are moral values education for freedom and its consequences for the student and the critical attitude in political education Attention is also paid to the historiography of this significant philosophical movement Regarding pedagogical research the empirical paradigm the falsificatory approach to educational research the complex relationship between educational theory and practice as well as the problem of value neutrality in educational science are objects of critical analysis **Education and Pedagogy in Cultural Change**

Wolfgang Brezinka,2017-09-18 In a period of rapid cultural shifts changing populations and new ideologies take hold and reshape political agendas and norms in the West It is against this backdrop that Wolfgang Brezinka presents his controversial take on the impact these changes have made on the public education landscape Offering his views on the historical context behind these cultural shifts Brezinka argues for the development of moral and values education in the West and discusses the conflicting roles migration divergent ideologies and other factors have had to play Focusing on pedagogy and policy Brezinka puts forth a provocative perspective on the relationship between pluralism tradition and the future of education

Constructing Social Support Systems for Left-behind and Migrant Children in China Ling Li,2021-10-14 The book studies the educational needs of two disadvantaged groups of children in China left behind children in rural areas and migrant children in urban areas aiming to optimize the social support system so that these disadvantaged children can realize their full potential The author conducts two separate researches and introduces the research background methodology related theories and advanced theories Main difficulties of left behind children and migrant children include parents lack of attention to their children s mental health teachers lack of expertise in working with these two groups of children and a lack of collaboration between schools and NGOs It suggests promoting systematic reform helping parents to develop effective parenting skills and establishing positive interactions among the stakeholders of social support for these disadvantaged

children The book will be of interest to people who work with left behind children in rural areas and those who work with migrant students in urban areas including teachers school administrators local educational authorities community based service providers and provincial and central departments of education **Education in a Society uncertain of its Values** Wolfgang Brezinka,2016-06-22 In recent decades the life circumstances of most people around the world have changed enormously We are again expecting scarcity and economic crisis the danger of war terrorism and environmental destruction However people s tendencies toward selfishness and the misuse of freedom uprooting dissoluteness and crime are also increasingly being seen as threats to society and individual citizens The decline of support giving religious worldview and moral traditions has given rise to great uncertainty about values Citizens increasingly experience this as a burden and are becoming more receptive to a reassessment More of us are seeking a new orientation Those responsible for children or youth require this with special urgency because uncertainty in value orientations also creates uncertainty in education Are there ways to escape this dilemma How can we achieve new clarity on the worldview and moral foundations of education To what ends should we direct education With what difficulties should we reckon What tasks must parents fulfil and which should be assigned to teachers These are the topics dealt with in this book It provides answers to the questions of parents teachers and other educators as well as to those of politicians economic leaders and spiritual counsellors It will serve to stimulate thought and contribute to achieving agreement on the central educational tasks of our time Socialization and Education Wolfgang Brezinka,1994-12-30 These three essays on social science terminology examine commonly used words whose meanings on closer examination are not clear The first essay analyzes the term socialization as it is used inconsistently by 24 authors in psychology sociology and education Brezinka contends that it is frequently confused with the term education to the detriment of both concepts The second essay Models in Educational Theories examines 15 usages of the term models including the vogue expression paradigm and finds little of use for the science of education in the concepts The third essay Conflict Education attacks the New Left and its pedagogical theories for failing to abide by basic principles of concept construction and use Throughout the book the author shows how imprecision can be identified and corrected **Educational Aims, Educational Means, Educational Success** Wolfgang Brezinka,1997 An introduction to the science of education according to the ends means scheme and based on empirical findings of the social sciences **Choice** ,1994 Forthcoming Books Rose Army,1993-12
