Snyder, 1963 **A History of Modern Germany Since 1815** Frank Tipton, 2003-01-01 Germany continues to fascinate us into the twenty first century because unlike the history or national existence of other European states its very being has been posed as a question Why was there no unified German state until late in the nineteenth century How did Germany become an industrial power What responsibility does Germany bear for the two World Wars This accessible but authoritative study attempts to answer these and other fundamental questions through looking at the economic social political and cultural forces which have created modern Germany The 1848 revolutions ushered in an age of Realism which saw rapid economic development and the creation of the Bismarckian empire

However by the early twentieth century Germany's economic expansion and position as a world power began to fracture and growing internal economic social and political contradictions led it with disastrous results into the First World War and the subsequent Weimar Republic Hitler and the Nazi movement proposed a revolution and the creation of a German style and the Second World War Holocaust is arguably the defining event of the twentieth century The Americanization of the German economy and society the economic miracle and euphoria of reunification have in recent years rapidly given way to disillusionment as the major political parties have failed to master outstanding social and environmental problems The German question Germany's place within the European Union continues to be unanswered even within an EU where it is the dominant economic power

A History of Modern Germany Dietrich Orlow, 2016-11-03 Covering the entire period of modern German history from nineteenth century imperial Germany right through the present this well established text presents a balanced general survey of the country's political division in 1945 and runs through its reunification in the present Detailing foreign policy as well as political economic and social developments A History of Modern Germany presents a central theme of the problem of asymmetrical modernization in the country's history as it fully explores the complicated path of Germany's troubled past and stable present

The Origins of Modern Germany Geoffrey Barraclough, 1984 No one is likely to underrate the importance for the rest of Europe and indeed for world history of the German reaction beginning in the days of Bismarck to the crisis of modern industrial capitalism writes Professor Barraclough but the peculiar character of that reaction is only comprehensible in the light of Germany's past Factors deeply rooted in German history constituted an iron framework a mold within which were cast all German efforts from 1870 to 1939 to cope with the problems of modern

capitalist society
