

Building A Houseful of Furniture

Steve Watts has been building and designing fine furniture for 20 years. Now he offers complete plans drawings for 43 of his most successful designs—bed frames with sturdy mattress supports, a variety of handsome chairs and benches, comfortable chaise and sofas. With the aid of numerous drawings and sketches, he also explains how to handle the tricky technical problems you may face when building the pieces, and describes in detail the procedures that brought the best results when he made the furniture himself.

Along the way, Watts writes engagingly about the history, uses and design of furniture, and often laughs into the development of his own designs.

If you've got a good group of keen, cabinetworking tools and techniques, you're right building these pieces. They combine great proportions with shapely and well-complemented forms designed in any style, antique or modern. All the designs can be built as shown in the drawings or you can use Watts' plans as a jumping-off point for your own creations.

In his career, Steve Watts has designed benches, bookshelves, tables and kitchenware. He is a contributing editor to *The Woodworking Magazine*, and has written many articles on building furniture and wooden toys.
