Building Skins Concepts Planning Construction:

Building Skins Christian Schittich, 2012-12-17 The external facades of a building are more than a protective mantle or an intelligent skin regulating temperature and light they also determine its very appearance By unusual choices of materials and the use of complex technology facades have become increasingly significant in recent years External surfaces are being perceived as an integral part of the building and are therefore being designed as such This volume focuses on the wide ranging aspects of facade design from the selection and use of materials to the advanced technical possibilities now open to the architect A wide array of carefully selected international examples show the theory in the practice All plans details and large scale sections of the facades have been researched with the high degree of competence typical of the editorial staff from the review Detail Expert authors provide the essential information needed to plan and design facades and elucidate on the latest developments in technology and materials

Rethinking Building Skins Eugenia Gasparri, Arianna Brambilla, Gabriele Lobaccaro, Francesco Goia, Annalisa Andaloro, Alberto Sangiorgio, 2021-12-05 Rethinking Building Skins Transformative Technologies and Research Trajectories provides a comprehensive collection of the most relevant and forward looking research in the field of facade design and construction today with a focus on both product and process innovation The book brings together the expertise creativity and critical thinking of more than fifty global innovators from both academia and industry to guide the reader in translating research into practice It identifies new opportunities for the construction sector to respond to present challenges towards a more sustainable efficient connected and safe future Introduces the reader to the role of facades with respect to the main challenges ahead Provides an overview of the major facade technological advancements throughout history and identifies prospective research trajectories Includes interviews with key industry players from different backgrounds and expertise Showcases a comprehensive range of leading research topics in the field organised by product and process innovation Covers major innovations across the value chain including facade design fabrication construction operation and maintenance and end of life Contributes towards the definition of an international research agenda and identifies emerging market opportunities for the facade industry

Facade Design, 2024-01-24 Facade design is a challenging task in which multidisciplinary issues and aspects should be optimally considered and addressed This is especially the case of building facades exposed to seismic events impacts or fire Special attention and major efforts are required for the detection and application of new technologies in the generation of modern adaptive facade systems This book presents a selection of research contributions to provide a comprehensive overview of facade design It discusses the experimental analysis and numerical investigation of existing or traditional facades as well as the development and optimal application of new technologies for modern adaptive facades and building envelopes

Facade Engineering - Concepts, Materials, Techniques and Principles of Construction, 2025-09-03 Facade engineering and design is a challenging task that requires the optimal consideration and addressing of multidisciplinary issues and aspects Over the past 15 years

facades have become increasingly complex with dynamic and smart facades ability to adapt to changing temperature and lighting conditions Newly developed materials and technologies have broadened the scope of facade functions This book presents a selection of research contributions to provide a comprehensive overview of facade design focusing on material analysis strategies and approaches for energy efficient facades based on scientific sustainable principles as well as high performance requirements such as fire risk and heat transfer and environmental design and process methodologies Contributions focus on the development of new strategies for maintaining and designing traditional facades as well as the optimal application of new technologies for modern adaptive facades and building envelopes

Design and Construction of Bioclimatic Wooden Greenhouses, Volume 3 Gian Luca Brunetti, 2022-12-19 This book is the third of four dealing with bioclimatic design and construction by focusing on the most basic and polyvalent of modern environmental systems the bioclimatic greenhouse the Swiss army chainsaw of architecture More specifically this third volume focuses on how the envelope of bioclimatic wooden greenhouses may be designed and built In more general terms it helps us to consider how to design and build the transparent and opaque enclosures of bioclimatic low energy architecture with low environmental impact This multi volume book covers both free standing greenhouses that can naturally heat and cool themselves and lean to greenhouses that support the natural heating and cooling of buildings this includes both agricultural greenhouses and greenhouses suited to host people As a result it is a trans disciplinary work deriving its areas of concern from a broad range of study areas spanning from environmental to constructional to structural drawing the clarity of the approach from the fact that the topics are presented by a single author with a single voice and a designer s mindset To achieve this the book adopts a composite set of explanatory strategies and communication registers including extensive support by 3D construction drawings and examples and presents not only state of the art solutions but also experimental ones

Glass Structures Jan Wurm, 2007-06-22 Flat glass opens up more possibilities for the planner than virtually any other material Because of the technological complexity of using it however no specific structural forms have been developed for glass supporting frameworks as they have been for wood concrete and steel This book is thus the first to present a coherent guide to the planning and design of glass supporting frameworks The focus is on the pressure resistant flat supporting element as a basic building block for broad supporting structures The spatial and constructive forms of multifunctional self supporting glass envelopes are vividly illustrated and systematically explained The constructions presented exhibit new aesthetic qualities based not on the dictum of dematerialization but on the poetry of gleaming and transparent planes They ring in a new chapter in the history of glass architecture

Bio-based Building Skin Anna Sandak, Jakub Sandak, Marcin Brzezicki, Andreja Kutnar, 2019-03-04 This book provides a compendium of material properties demonstrates several successful examples of bio based materials application in building facades and offers ideas for new designs and novel solutions It features a state of the art review addresses the latest trends in material selection assembling systems and

innovative functions of facades in detail Selected case studies on buildings from diverse locations are subsequently presented to demonstrate the successful implementation of various biomaterial solutions which defines unique architectural styles and building functions The structures morphologies and aesthetic impressions related to bio based building facades are discussed from the perspective of art and innovation essential factors influencing the performance of materials with respect to functionality and safety are also presented Special emphasis is placed on assessing the performance of a given facade throughout the service life of a building and after its end The book not only provides an excellent source of technical and scientific information but also contributes to public awareness by demonstrating the benefits to be gained from the proper use of bio based materials in facades As such it will appeal to a broad audience including architects engineers designers and building contractors
