Intertidal History in Island Southeast Asia Jennifer L. Gaynor, 2016-06-15 *Intertidal History in Island Southeast Asia* shows the vital part maritime Southeast Asians played in struggles against domination of the seventeenth century spice trade by local and European rivals Looking beyond the narrative of competing mercantile empires it draws on European and Southeast Asian sources to illustrate Sama sea people's alliances and intermarriage with the sultanate of Makassar and the Bugis realm of Bone Contrasting with later portrayals of the Sama as stateless pirates and sea gypsies this history of shifting political and interethnic ties among the people of Sulawesi's littorals and its land based realms along with their shared interests on distant coasts exemplifies how regional maritime dynamics interacted with social and political worlds above the high water mark **Indonesia** Jean Gelman Taylor, Yale Univ Pr, 2003-01-01 *Social History of Indonesia*

Archaeology and Culture in Southeast Asia Wilhelm G. Solheim (II.), David Bulbeck, Ambika Flavel, 2006 A synthesis of almost four decades of articulation on the Nusantara by the senior practitioner of archaeology in Southeast Asia This book draws on his knowledge of networks of interactions existing in various time depths peopled by what he generally labels Nusantara **On the Edge of the Banda Zone** Roy Ellen, 2003-08-31 The impact of the Indonesian spice trade on global and more particularly European history has been widely acknowledged Although more recent studies have gone beyond the preoccupation with the colonial relationship to provide a more Asiatic view *On the Edge of the Banda Zone* is the first to focus an anthropological lens on the dynamics of trade in a specific area that incorporating the Seram Laut and Gorom archipelagoes and the adjacent mainland of east Seram in the Moluccas The point of departure for Roy Ellen's analysis is a description of trade relations in the east Seram zone between 1970 and 1990 but the wider importance of the data presented here is readily apparent For five hundred years and probably much longer it has served as a corridor between Eurasia and the southwestern Pacific and played a vital role in the production and distribution of nutmeg and other high value commodities that have for centuries had an impact on the global economy Drawing on the author's fieldwork as well as archival and secondary sources this ambitious eclectic volume demonstrates the enduring continuities in the local system as it comes into contact with the changing outside world It illuminates how barter ecological and ethnic divisions of labor exchange patterns and the organization of trade between the peoples of the New Guinea coast and east Seram help us make sense of long term cycles and trends **Madurese Seafarers** Kurt Stenross, 2011-08-31 The Madurese are one of the great maritime and trading peoples of the Indonesian Archipelago This study takes readers into the trading villages of Madura with their remarkable traditional vessels perahu that were powered by sail until the late twentieth century and examines their informal sector economic niches notably the cattle salt and timber trades and the carriage of people The book argues that the nature of village society the physical characteristics of the island's coast cultural traditions of frugality and self reliance and an appetite for risk all contributed to the enduring success of Madurese traders During Suharto's New Order Madurese

seafarers prospered through their central role in the booming timber trade between Kalimantan and Java using great ingenuity and quasi legal means to negotiate state laws and regulations Based on data collected during visits to remote ports and unlicensed sawmills in Kalimantan perahu harbors in Java and wild beach ports in Madura the book explores the inner workings of Madurese maritime trade during a critical period that brought this village based transport industry into a modern and increasingly regulated economic environment

Exploring Ancient Skies David H. Kelley, Eugene F. Milone, 2005-12-06 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 the lion horoscope or the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history

Asian Perspectives ,2001 **Bijdragen tot de taal-, land- en volkenkunde van Nederlandsch-Indië** ,2002 Literatur overzicht issued with v 95 **Anthropologica** ,2002 Includes reports of meetings of the institute [Vaka Moana](#), [Voyages of the Ancestors](#) K.
