For more than fifteen years the authors have been conducting research and professional development in school districts across the United States. This work has shown that the SOAR Teaching Frames for Literacy provide a unique approach to planning, implementing, and elevating instruction that drives improvement in teaching and learning. One distinguishing aspect of the SOAR work is the focus on the high impact teaching practices that research identifies as key to student learning. A second distinguishing aspect is that the practices are presented and unpacked within the context of teaching frames. Each teaching frame is designed to help educators understand and implement the high impact practice that drives student learning while simultaneously enacting a set of dynamic instructional moves in support of the high impact practice and taking the foundational planning steps needed to do this well. Detailed instructional strategies are provided as a way to help teachers understand how to implement and continuously improve these practices. A third distinguishing aspect of the work is that the teaching frames provide a common language and a set of tools to foster teacher to teacher and coach to teacher collaboration that supports professional learning and growth across schools and districts. Principals, coaches, and teachers who have participated in SOAR professional learning report that the teaching frames provide them with a lens for continued professional learning and growth.

Building Culturally Responsive Classrooms Concha Delgado Gaitan, 2006-04-28. The author shows how teachers honoring real culture can transform the context and content within their classrooms while creating learning settings that challenge students academically.

Building Capacity: Using TEFL and African Languages as Development-oriented Literacy Tools Ngessimo M. Mutaka, 2008. Building Capacity promotes the vision that the teaching of African languages can best achieve its aim of boosting the economic and cultural development of the Africans if they are made to work in synergy with a revamping of the course contents of international languages that will be taught within the frame of a development oriented literacy curriculum. Great emphasis is put on the oral skills in the use of African languages as they are to serve as a link between the community and the school for the ultimate revitalization of the positive aspects of African cultures in a world beset by globalization. The book is supplemented with a sample of texts in the appendix that are meant to be a bridge between formal texts taught in classrooms and literacy texts that can raise the genuine interests of the local populations in that they address their immediate needs. Among the possible topics language teachers are encouraged to explore in their classes are those concerning economic development but also such issues as health education, the environment, food security, and conflict resolution. In the face of the growing interest in the use of African Languages by Africans as symbols of personal and cultural identity and as means of empowering the rural communities in the enterprise of national development, the need for a methodologically appropriate manual to guide the teaching and learning of African languages becomes urgent. This book is a timely response predicated on a policy of the symbiotic use of African languages along with partner foreign official languages to attain a balanced level of economic and socio cultural development. It is based on a compendium of well thought out principles geared towards a rapid acquisition of

written and oral language skills that are congruent with and reflect the socio cultural and economic concerns of the linguistic community

Beban Sammy Chumbow Professor of Linguistics University of Yaounde I

Among the numerous proposals in this book is the necessity for Africans and I would add for the communities of Asia and Latin America to re think the contents of their language courses and assign them an objective which aims at the integral development of their communities

It is indeed imperative that these courses reflect clear objectives of seeking social cultural and economic developments that harmonize with African Asian and Latin American values that are deep rooted in their respective various cultures

Jean Pierre Angenot Professor of Linguistics Federal University of Rondonia Porto Velho Brazil
