Roy W. WHITE,1952 Management of Building Projects : a Practice Manual for All Lead Roles from Project Concept to Completion BC Building Projects Committee,BC Building Projects Committee. Practice Manual Task Force,2004 Building Practice in the Dutch East Indies David Hutama Setiadi,2022-12-30 This book reveals the epistemic imposition of architectural ideas and practices by colonists from the Netherlands in the Dutch East Indies from the late 19th century onwards exploring the ways in which this came to shape the profession up to the present day in what is now known as Indonesia The author investigates the scope of these interventions by Dutch colonial agents in relation to existing Javanese building practices pursuing two main lines of enquiry The first is to examine the methods of dissemination of Dutch taught technical knowledge and skills across the Dutch East Indies The second is to scrutinise the effects of this dissemination upon the formation of architectural knowledge and practice within the colony Throughout this book the argument is made that what took place in architecture in the Dutch East Indies involved a process of disseminating building knowledge as a form of epistemic imposition upon the indigenous citizens of the colony in other words as an effective instrument of Dutch colonial power This book will be of interest to architecture academics and students interested in developing a broader global understanding of architecture especially those interested in decolonising the teaching of architectural history and theory
