Bravo Two Zero:

Bravo Two Zero Andy McNab,1994 In January 1991 eight members of the SAS regiment embarked upon a top secret mission that was to infiltrate them deep behind enemy lines Under the command of Sergeant Andy McNab they were to sever the underground communication link between Baghdad and north west Iraq and to seek and destroy mobile Scud launchers Their call sign Bravo Two Zero Each man laden with 15 stone of equipment they patrolled 20km across flat desert to reach their objective Within days their location was compromised After a fierce firefight they were forced to escape and evade on foot to the Syrian border In the desperate days that followed though stricken by hypothermia and other injuries the patrol went ballistic Four men were captured Three died Only one escaped For the survivors however the worst ordeals were to come Delivered to Baghdad they were tortured with a savagery for which not even their intensive SAS training had prepared them Bravo Two Zero is a breathtaking account of Special Forces soldiering a chronicle of superhuman courage endurance and dark humour in the face of overwhelming odds Believed to be the most highly decorated patrol since the Boer War Bravo Two Zero is already part of SAS legend The Real Bravo Two Zero Michael Asher,2002 The truth of the story behind Bravo Two Zero the code name given to the famous SAS operation in Iraq during the Gulf War *Bravo Two Zero* Andy McNab,1994 The harrowing 1991 mission of eight men from the British Special Forces is revealed by their leader as he relates their venture behind Iraqi lines the deaths of three of their team and the capture and torture of another four Reprint

Soldier Five Mike Coburn,2004 SOLDIER FIVE is an elite soldier s memoir of his time within the Special Air Service SAS and in particular his experiences during the Gulf War As a member of the Special Forces patrol now famously known by its call sign Bravo Two Zero he and seven others were inserted hundreds of kilometres behind enemy lines Their mission was to reconnoitre targets undertake surveillance of Scud missile sites and sabotage Iraqi communications links but was to end in desperate failure From the outset the patrol was dogged by problems that contributed both directly and indirectly to the demise of the mission The patrol s compromise and subsequent attempts to evade Iraqi troops resulted in four members of Bravo Two Zero being captured and a further three killed One escaped But the story goes further than the Gulf War itself Despite numerous books films and articles on the same subject the British Government has done its utmost to thwart the release of Soldier Five at one stage claiming the book in its entirety was confidential A campaign of harassment that took some four and a half years of litigation to resolve has now resulted in this explosive publication SOLDIER FIVE is a gripping and suspenseful account of one man s experiences as a Special Forces soldier Revealing his conflicts loyalties and relationships forged it is the resolution of a soldier s determined fight to see his story told Special Warfare ,1995

Special Force Alastair MacKenzie,2011-10-30 The exploits of the British Army s elite 22nd Special Air Service Regiment the regiment of the SAS that forms part of the Regular army are shrouded in mystery and myths abound about its members But what is the truth behind the public facade of clinical professionalism How has such a small regiment attracted so many

weighty legends And what is the purpose of the SAS in the 21st century Special Force provides an original and unusually critical overview of the activities of the SAS from the Malayan Emergency of 1950 to the present day In the context of a detailed and often controversial analysis of the post war activities of the Regiment MacKenzie establishes that the Regiment's almost legendary professional competence is often not backed up by reality Far from being part of a structured deployment of strategic military assets MacKenzie argues that the use of the SAS in recent years has been primarily driven by the entrepreneurial actions of a few SAS commanding officers Special Force not only offers a revelatory history of the SAS in the modern period it is also a disturbing expose of the truth behind the myth It will be essential reading for anyone with an interest in the British military past present and future *United States Army Aviation Digest*, 1969

The Next World War James Adams, 2001-03-23 It is a silent invisible and deadly weapons system It can paralyze an entire nation without a single soldier being sent to war We glimpsed its potential on television when surgical strikes on radar sites electrical power plants and command networks crippled Iraqi forces during the Gulf War Now in *The Next World War* James Adams shows how a new chapter in military history is being written as the Information Age comes to the battlefield to bigger and stronger now add smarter As increasingly sophisticated computers and microtechnology have become available the concept of conventional warfare has changed Technology has already made its way to the front lines soldiers are now equipped for example with new smart technologies such as handheld computers that allow them to e mail their commanders There are devices that can sense an enemy's presence before the enemy is visible by detecting body heat or by communication with satellites overhead Robotic bugs can even be sent in swarms to sabotage weapons or subdue enemy soldiers But the most significant and important use of information warfare won't be on the battlefield The most devastating weapons will be those that target an enemy's infrastructure air control systems electrical grids and communication networks to name just a few potential targets Trojan horse chips or viruses designed to accept and respond to commands from U S military intelligence can be installed in computers being sold overseas making them vulnerable to attack By hacking into computer systems the United States could override programmed commands and thus shut down air traffic control systems and open floodgates and bridges Misinformation could even be broadcast for example by using imaging technology to simulate a television appearance by an enemy nation's leaders This type of combat puts civilians at more risk than ever as financial communication transportation and other infrastructure systems become prime military targets And information warfare puts the United States a nation increasingly dependent on technology in a position of both definite advantage and extreme vulnerability In *The Next World War* James Adams draws on impressive research as well as his lifetime of reporting on intelligence and military affairs to give us a chilling scenario of how wars will be fought in the new millennium and how much closer to home they might strike *Military Survival* Nick Hunter, 2011-01-01 In *Military survival* you'll read about people who have some of the most dangerous jobs in the world and the special training and equipment they receive in order to

survive the most perilous situations P 4 of cover **SAS** Col. Thomas A. Hillary, 2009-10-07 This book provides an insight into my lifetime experiences from birth to the present day It also concentrates thoroughly on defining the qualities desired of an SAS military leader In terms of personal experiences of leadership I would say that the military provided me with a blueprint of acceptable leadership behaviours Looking at the training I went through with Special Forces reveals some of the unique qualities that are required to fulfil this role I would say that conventional military regiments differed somewhat to the democratic even abdicratic approach of Special Forces units such as the SBS SAS and 2REP French Foreign Legion While I was serving with the Marines I wanted to transfer to a Special Forces unit but was refused entry to the organisation because of my commitment to the Marines This was a great issue at the time but I eventually rejoined the SAS regiment anyway after resigning from the Marines My first period of SAS training followed passing of the usual Battle Fitness Test BFT that was completed while at a barracks off the King s Road in Chelsea I can explain that my first thoughts about joining the SAS occurred in 1976 when I was serving as a junior guardsman at Pirbright in Surrey The inspiration came from my platoon commander who had previously been a member of the Guards Independent Parachute Brigade This was a unit that largely preceded G Squadron of the SAS Regiment Later actions then included the Iranian embassy incident under direction of the Counter Revolutionary Warfare CRW team and patrols in areas of Northern Ireland that were subject to violent terrorist actions I served also with 23 and 21 between 1985 and 1992 and the Scots Guards and French Foreign Legion experiences came early in my career
