Tropical Forests, International Jungle M. Smouts, 2003-05-29 Marie Claude Smouts looks at the issue of rain forest depletion and global environmental policies Beginning with how the issue entered the world stage in the 1980s despite alarms over the issue in the 1950s Tropical Forests International Jungle explores the complexities of what are tropical forests what role they play not only in environmentalism but in trade health care and almost every facet of natural and social life for those living there and beyond Although for most in the developed world tropical forests have gained a status of part of our world heritage these forests are not really part of the global commons or a global public good Developing nations maintain control over the forests within

their borders and often use the forests as they see fit The international system for mediating the issue is a fractured group of non governmental organizations and transnational networks often with competing views of how to manage tropical forests Despite this seemingly grim picture Smuts is optimistic A changing world view toward forest depletion is influencing countries both North and South Although forests will be used commercially it is a dynamic process that should maintain them far into the future

Nation-States and the Global Environment Erika Marie Bsumek, David Kinkela, Mark Atwood Lawrence, 2013-04-02 Hardly a day passes without journalists policymakers academics or scientists calling attention to the worldwide scale of the environmental crisis confronting humankind While climate change has generated the greatest alarm in recent years other global problems desertification toxic pollution species extinctions drought and deforestation to name just a few loom close behind The scope of the most pressing environmental problems far exceeds the capacity of individual nation states much less smaller political entities To compound these problems economic globalization the growth of non governmental activist groups and the accelerating flow of information have fundamentally transformed the geopolitical landscape Despite the new urgency of these challenges however they are not without historical precedent As this book shows nation states have long sought agreements to manage migratory wildlife just as they have negotiated conventions governing the exploitation of rivers and other bodies of water Similarly nation states have long attempted to control resources beyond their borders to impose their standards of proper environmental exploitation on others and to draw on expertise developed elsewhere to cope with environmental problems at home This collection examines this little understood history providing case studies and context to inform ongoing debates

Stakeholders, the Environment and Society Sanjay Sharma, Mark Starik, 2004-01-01 The role of stakeholders is integral to corporate sustainability as society increasingly demands that corporations play a role in achieving environmental objectives in addition to building shareholder wealth In this the first book to gather cutting edge

Guardians of the Brazilian Amazon Rainforest: Environmental Organizations and Development Luiz C. Barbosa, 2015-05-08 The Amazon region is the focus of intense conflict between conservationists concerned with deforestation and advocates of agro industrial development This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia It reveals how environmental organizations such as Greenpeace Friends of the Earth WWF and others have fought fiercely to stop deforestation in the region It documents how the history of frontier expansion and environmental struggle in the region is linked to Brazil s position in an evolving capitalist world economy It is shown how Brazil s effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia The author

analyses how globalization has led to the expansion of international commodity chains in the region particularly for mineral ores soybeans and beef He shows how environmental organizations have politicized these commodity chains as weapons of conservation through boycotting certain products while other pro development groups within Brazil claim that such organizations threaten Brazil s sovereignty over its own resources *Chronicling Amazon Town* Richard Pace, Helena P. Lima, 2024-07-03 This book brings together the work of researchers from a variety of fields to provide a comprehensive synthesis of local and regional studies in the town of Gurup in Brazil ranging from archaeological findings to ethnohistory and sociocultural anthropology
