

A man with dark hair, wearing a white button-down shirt, is shown from the side, looking at a computer monitor. The monitor displays a complex diagram featuring two DNA double helices, a chemical structure of a hexagonal ring system, and various labels including 'DNA', 'RNA', and 'ATP'. The background is a wall covered in hand-drawn sketches of molecular structures and graphs. A semi-transparent dark box with white and yellow text is overlaid on the center of the image.

Biohackers Magazine Issue 17 , When one experiences a new product a new treatment or a new idea there's little that compares to the feelings of excitement and hope that rush in fueling one's faith in the upright direction of humanity I just recently attended the 8th Annual Biohacking Conference hosted by Dave Asprey in LA and like each biohacking event I left feeling inspired to say the least Everything I saw every person I met and every biohack I experienced further fed my appetite to share these great ideas and practices with the world a world hungering for the opposite approach of industrialized medicine Now of course not every biohack is exactly 100% proven Suffice it to say there are many that are still in the process of collecting data from studies and clinical trials However those that have stood up to the modern pill popping regimes and have adamantly supported their ideas on the foundations of strong scientific data are truly examples to be held in high regard I was impressed with the many products and companies at the conference that held a mission of dedicated service to fellow mankind Yes like in any startup industry or even industry for that matter there are those who are looking to push some falsehood to scheme people into buying their product or services But as we know the companies that rise to the top are those that stick to the cardinal virtues that make up all of us Prudence Justice Fortitude and Temperance The Biohacking Industry is outgrowing its mold and soon a new layer of enthusiasts will be added This is something that should enthrall us but it shouldn't permit us to lose sight of the foundational attributes that make and will continue to make us biohackers for the rest of our lives Essentially we are all after freedom freedom from disease freedom from injury freedom from hysteria and freedom from aging Responsible Biohacking is perhaps the best way towards that freedom and we must continually adjust our sails to catch the winds that stem from truth and service That is what we at Biohackers Magazine strive towards serving the community through the provision of information carefully discerned and attuned to the values of sincerity and science

performance **Biohackers Magazine Issue 9** Biohackers Magazine , The importance of continual self improvement and development cannot be understated especially in the world of biohacking But there is also something that cannot be overstated in this same realm of personal health and growth and that is the vital role that women play Often argued and affirmed as the more intuitive of the 2 sexes women have and continue to push themselves and their community towards their health wellness and wisdom goals In a lot of ways men have it easy Our bodies instruction manual is comparable to a generic IKEA coffee table s guided instructions not a lot to decipher But some could compare women bodies manuals to NASA s rocket construction directions a lot of steps and A LOT to understand Granted the woman s body is easily the more attractive of the two in my opinion and I want it to be clear that although this statement is bias I mean this as a more aesthetic art like manner The symmetry the intricacy the mysteriousness the gracefulness just the way everything connects Perhaps its because of this clear advantage in the beauty category that it takes a lot to master all the processes within it It once was said that in the beginning God first made man but then afterwards he took a long look at him and then told himself I can do better than that and then made woman Women are at the forefront of biohacking and its clear that the industry would not be where it is today without them Due to women having to figure out all of their complexities but also having the tenacity and courage to do so they have stood side by side with men and helped to share the helpful and needed knowledge of health optimization with the world It is with great pleasure and respect that we dedicate this issue to all of the women in the world striving to promote good health strong lives and clearer minds Although we have had and will continue to have female authors and subject matter in past and future issues every article contained inside this particular issue is either written by a female author or purely feminine in subject matter This is our way to take a moment to highlight and thank all those women out there doing their thing At Biohackers Magazine we believe no we know that every woman s thought and word is just as important as every man s And we are here to provide this magazine as the ontic evidence to that Without further ado enjoy your new woman ful issue

Biohackers , The world and the humans share a special bond together The world is a place full of vibrant life unpredictable events and a sort of beautiful self sustaining chaos The Human being s journey on this Earth is one that is corporeal yet also deeply spiritual The world presents so many things into our lives that often we forget that we are more than just what invokes responses from our physical senses What separates man from every other creature is his ability to think rationally What man lacks in survival endowments such as long claws fur etc man makes up for in his ability to know Man can think and know that he thinks Man can eat and know that he eats Man can speak and know that he speaks The human being is able to conquer and have dominion over the creatures and the world itself because of this unique ability to know rationally There are many different areas where the human being shows this separation of pure intellect One would be his tool making ability or homo Faber It is true that some monkeys can make tools but it is the only man that makes these tools not just as an extension of their bodily reach but as direct fruition of their thoughts Community Language Science Arts Religion Death and Culture are all elements that show man s rationality his intellect The intellect exists in the soul of man and animates the body through the influence on man s free will Too often we focus on the superficial parts of ourselves and get lost in the mainstream s constant influential assault about how we should be physical While of course we are composed of the body we must remember that it is the soul that also makes up our life and its health must also be taken into consideration in everything we do We can define a human being as a rational animal a composite of both body and soul Its soul is the subsistent element and its powers involve the knowing intellect and the will to do good With free will aiming toward good and knowledge aiming towards the truth the human being works towards becoming more beautiful in the sense of intentionality of culture Biohacking in its deepest sense must look beyond the temporal world of physiological and temporal matter and adhere to the health and the growth of the human soul We are all on this Earth together and as biohackers we have the mission of increasing our knowledge every single day to feed not only our bodies and brains but most importantly our souls When one chooses to take the time to explore such questions as who they are and how they act and where they are going and what is

their purpose they increase their value as a person through this continual development Their soul becomes more of a master over their temporal body and they can live life with perhaps more peace and happiness because of their continued growth and development of their soul which acts through their body
