Action In The Classroom A Guide To Student Produced Digital Video In K 12 Education:

Action! In the Classroom Daniel R. Greenwood, 2003-03-12 Today's students are attracted to video and readily engage in any project that incorporates the medium. Digital video is easier to manipulate and much less expensive than analog video. Students can create video content and the software can be taught in less than one hour. There is great potential to employ student produced video as an educational tool and this book explains and instructs teachers how to exploit this potential. This comprehensive work divided into four sections covers all aspects of video production including foundation concepts, the video production process, equipment review, and an appendix. The companion Web site offers downloadable forms used in the book and support presentation material. Features Up to date information on software and hardware for both Macintosh and Windows. Details on teaching communications skills and aesthetic education and methods for evaluation. Authentic methods and procedures used in the entertainment and video industry. Explains how the teacher can re create a realistic video environment. K 12 teachers, computer coordinators, directors of technology, librarians, and teachers in training will use the information and guidance offered to teach communication, aesthetics, and higher order thinking skills. Engaging Classrooms and Communities Through Art Beth Krensky, Seana Lowe Steffen, 2009 The book combines case studies with diverse groups across the country that are using different media including mural arts, dance, and video with an informed introduction to the theory and history of community based art. It is a perfect handbook for those looking to transform their communities through art. Library Media Connection , 2003 Handbook of Research on Digital Tools for Writing Instruction in K-12 Settings Anderson, Rebecca S., Mims, Clif, 2014-04-30 More emphasis is being placed on writing instruction in K 12 schools than ever before. With the growing number of digital tools in the classroom, it is important that K 12 teachers learn how to use these tools to effectively teach writing in all content areas. The Handbook of Research on Digital Tools for Writing Instruction in K 12 Settings will provide research about how students use digital tools to write both in and out of school settings as well as discuss issues and concerns related to the use of these learning methods. This publication is beneficial to educators, professionals, and researchers working in the field of K 12 and teacher education. School Library Journal , 2003 Resources in Education , 2001 **American Book Publishing Record** , 2003 Handbook of Research on Teaching Literacy Through the Communicative and Visual Arts, Volume II James Flood, Shirley Brice Heath, Diane Lapp, 2015-04-22 The Handbook of Research on Teaching Literacy Through the Communicative and Visual Arts Volume II brings together state of the art research and practice on the evolving view of literacy as encompassing not only reading, writing, speaking, and listening but also the multiple ways through which learners gain access to knowledge and skills. It forefronts as central to literacy education the visual, communicative, and performative arts and the extent to which all of the technologies that have vastly expanded the meanings and uses of literacy originate and evolve through the skills and interests of the young.
