Action Of Human Resources And Poverty On One Another:

Poverty Comparisons and Household Survey Design Steven Howes, Jean Olson Lanjouw, 1997-01-01 World Bank Discussion Paper No 356 The World Bank has become the world's largest lender in the health nutrition and population HNP sectors requiring the institution to seek ever greater evidence that its work is effective on the ground This paper reviews the literature on the causes of observed changes in health and fertility levels on the evaluation of policies and on programs designed to accelerate these changes It presents a framework that delineates the relationships between Bank activities in the HNP sectors the characteristics of a health care system household behavior and changes in health outcomes The paper also describes a strategy for assessing the development effectiveness of the Bank's work in these sectors The underlying thesis is that changes in health policy and improved outcomes depend on the demand for health services and on institutional incentives that drive health care system performance **Measuring the Effects of Geographic Targeting on Poverty**

Reduction Judy L. Baker, Margaret E. Grosh, 1994 This third and final volume from the City Study analyzes the structure of Bogota and Cali Colombia by modelling different markets and the behavior of individuals households firms and governments within these markets Simple economic reasoning is used to understand the urban behavior that can determine a city's overall appearance and structure The author underlines the importance of this understanding which he argues could lead to the creation of more effective urban policies This study links infrastructure requirements and supply to the behavior of urban life and to the existing income distribution in the city The author concludes that institutional responses to the rapidly changing and unpredictable demands of metropolitan residents must become an inherent part of city structure and that this would be the most practical way of coping with urban growth *Poverty Lines in Theory and Practice* Martin Ravallion, 1998-01-01 A poverty line helps focus the attention of governments and civil society on the living conditions of the poor This paper offers a critical overview of alternative approaches to setting poverty lines In reviewing the methods found in practice the paper tries to throw light on and go some way toward resolving ongoing debates about poverty measurement emphasizing those debates which would appear to have greatest bearing on policy discussions *Infrastructure and Poverty in Viet Nam* Dominique Van de Walle, 1996 In 1992 the World Bank launched the Africa's Management in the 1990s research program a comprehensive study of the issues of institutional capacity building in Sub Saharan Africa and its effects on economic and social development This report focuses on the program and on how to implement its main message institutions must be both rooted in the local context and culture and open to outside challenges and influences Chapters focus on the institutional aspects of capacity building best practices in public administration indigenous private sector development and a framework for reconciliation between institutions **Poverty Comparisons** Martin Ravallion, 2001 This book provides an accessible introduction to the most recent literature on poverty comparisons assessing the strengths and weaknesses of past methods and giving a summary of methodological recommendations *Poverty Comparisons* M. Ravallion, 2013-10-08 Poverty

comparisons such as whether poverty has increased or where it is greatest are typically clouded in conceptual and methodological uncertainties How should individual well being be assessed in deciding who is poor Is a household survey a reliable guide Where should the poverty line be drawn and does the choice matter This monograph surveys the issues that need to be considered in answering these questions providing an accessible introduction to the most recent literature The strengths and weaknesses of past methods are discussed and a summary of methodological recommendations is given A number of new analytical tools are described which can greatly facilitate poverty comparisons recognising the uncertainties involved

The Role of the Private Sector in Education in Vietnam Paul Glewwe, Harry Anthony Patrinos, 1998 As part of the restructuring of the educational system in 1989 the Vietnamese government implemented policy changes such as promoting the establishment of people's and community educational institutions permitting the establishment of private institutions and transforming public institutions into private ones Since Vietnam has only recently moved from a centrally planned to a market economy private schools are still relatively rare in Vietnam This paper examines the nature of private schooling in Vietnam using data from the 1992-93 Vietnam Living Standards Survey

The Impact of the Quality of Health Care on Children's Nutrition and Survival in Ghana Victor Lavy, 1995 Surveys the World Bank's experience in supporting developing country civil service reforms and begins to assess the progress made The World Bank recognizes the importance of the civil service to the general welfare of the 4.6 billion people in low and middle income countries Between 1981 and 1991 civil service reform was a prominent feature of 90 World Bank lending operations This paper surveys the Bank's experience in supporting this reform and assesses the progress made The lending operations concentrated on two separate dimensions 1 Shorter term emergency steps to reform public pay and employment policies which center on measures to contain the cost and the size of the civil service 2 longer term civil service strengthening efforts directed toward ongoing sustained management improvements After examining the record of these reforms the authors conclude that the results have been mixed at best They recommend greater emphasis on devising a coherent far reaching strategy for reform and on detailing the set of tactics by which these goals will be achieved

Poverty and Inequality among Chinese Minorities Ajit S. Bhalla, Shufang Qiu, 2024-11-01 The number of poor people in China is huge despite recent economic advances The minorities in China constitute less than ten per cent of the entire population yet they represent forty to fifty per cent of the absolute poor This compelling book investigates the problem of poverty and inequality in and among Chinese ethnic minorities focusing in particular on two important questions Have the minorities shared the fruits of spectacular economic growth in China during the past two decades Is their backwardness due to ethnic and cultural factors or to extremely low incomes The authors examine the different factors explaining poverty the relationship between poverty and ethnicity poverty indicators that permit a comparison between minorities and non minorities or the Han majority economic and demographic characteristics of minorities and their educational occupational and gender profiles They consider whether special measures

in favour of minorities introduced by the Chinese government have contributed to an improvement in their standard of living Poverty and Inequality among Chinese Minorities gives original research findings and new thinking on a highly topical issue in Chinese development economics and fills a gap in the existing economic literature

Conceptualizing the Ubiquity of Informal Economy Work Errol D'Souza, 2020-08-26 This book provides a framework to understand the disregarded aspect of emerging market growth which is informal employment Informal employment in unregistered enterprises or of workers without employment contracts or social protection contributions constitutes 88 per cent of employment in India and is a ubiquitous feature of the economy A large proportion of informal employment 86 per cent is self employment and this category of employment has been neglected in the literature on work and development which has focused instead on wage employment that is a contract for work with another person or enterprise Another striking feature of such economies which the book engages with is that as they have liberalized informal employment in the registered enterprises or formal part of the economy has grown The informal sector has been analyzed by recourse to two major approaches One is a public economics framework that underlines how informal enterprises evolve as they trade off reduced access to public services such as contract enforcement with the payment of taxes and regulatory compliances This book extends this literature by focusing on the access to formal sector credit and its potential for financing productive enterprises as a factor that is considered when an enterprise contemplates whether to incorporate or not The second leg of the literature takes a labour perspective and emphasizes mandated labour costs such as hiring and firing costs benefits and minimum wages as considerations when deciding on whether to engage labour on a formal or informal basis The book broadens this literature by taking into account how the human capital of workers and the monitoring costs of ensuring that workers are adhering to the terms of negotiated contracts inform the decision with regard to informality The book will resonate with those academics and policy makers who are engaged with the conundrums of development
