and the application of homogeneous models to such problems gives in the best case only approximated results or in the worst case nonsense results **Vinzenz Bronzin's Option Pricing Models** Wolfgang Hafner, Heinz Zimmermann, 2009-11-18 In 1908 Vinzenz Bronzin a professor of mathematics at the Accademia di Commercio e Nautica in Trieste published a booklet in German entitled Theorie der Prämienverträge Theory of Premium Contracts which is an old type of option contract Almost like Bachelier's now famous dissertation 1900 the work seems to have been forgotten shortly after it was published However almost every element of modern option pricing can be found in Bronzin's book He derives option prices for an illustrative set of distributions including the Normal This volume includes a reprint of the original German text a translation as well as an appreciation of Bronzin's work from various perspectives economics history of finance sociology economic history including some details about the professional life and circumstances of the author The book brings Bronzin's early work to light again and adds an almost forgotten piece of research to the theory of option pricing **Computation and Modelling in**
