Styles of Mathematization: The Case of 18th Century

Electrostatics Lucas Marcelo Cavalari Nardi, 2025-08-16 This book studies the mathematization of physics with a special emphasis on 18th century electrostatics as a case study The mathematization of a scientific field is a fruitful yet underdeveloped topic that can be seen through different lenses A noticeable one is the Inferential Conception proposed by Mark Colyvan and Ot vio Bueno In this regard the use of mathematics is understood as a set of mappings relating the physical realm and the mathematical realm However the historical process related to the use of mathematics remains unsolved philosophical frameworks usually have a hard time dealing with historical dimensionality Therefore this book provides a study of the historical process of mathematization going beyond the framework in order to explain the use of

mathematics a historically using the aforementioned investigation of 18th century electrostatics The research developed gravitates around two centers the history of physics and the philosophy of science making the book of equal importance to both historians and philosophers of science *18th Century Turkish and other European Janissary - Vol. 1* Chris Flaherty, 2024-09-12 This book looks at the ranks badges and uniforms worn by Turkish and other European Janissary in the 18th Century The follow on Volume II of this book looks at Janissary organization and battle tactics of the Turkish Kapikulu Ocaklari Kapikulu Akerleri Standing Army from the later 18th Century to the Napoleonic era Volume II also covers traditional Artillery Miners and Transport Troops who had a direct relationship in terms of the entrenchment battle tactics used at the time by the Janissary [A Critical Bibliography of French Literature V4 18th C Supplement](#) Richard A. Henke, 2014-10-14 While the popular talk of English common sense in the eighteenth century might seem a by product of familiar Enlightenment discourses of rationalism and empiricism this book argues that terms such as common sense or good sense are not simply synonyms of applied reason On the contrary the discourse of common sense is shaped by a defensive impulse against the totalizing intellectual regimes of the Enlightenment and the cultural climate of change they promote in order to contain the unbounded discursive proliferation of modern learning Hence common sense discourse has a vital regulatory function in cultural negotiations of political and intellectual change in eighteenth century Britain against the backdrop of patriotic national self concepts This study discusses early eighteenth century common sense in four broad complexes as to its discursive functions that are ethical which at that time implies aesthetic as well transgressive as a corrective political in patriotic constructs of the nation and repressive of otherness The selection of texts in this study strikes a balance between dominant literary culture Swift Pope Defoe Fielding Johnson and the periphery such as pamphlets and magazine essays satiric poems and patriotic songs
