## **19 Improving Schools And Why:**

**19 Improving Schools--and why** Peter L. Clancy, 1982 Students at 19 Michigan elementary schools in 17 districts showed a dramatic improvement in Michigan Educational Assessment Program test score results from 1976 to 1979 A three pronged effort to identify the factors associated with the improvement involved a computer analysis of school demographic data field interviews and a symposium of 107 key personnel from 18 of the 19 schools who corroborated the field interviews Analysis of the demographic data failed to reveal any positive correlation with success however a Formula for Success extracted from the interviews and symposium contains seven elements that constitute a critical mass that all 19 schools possess The seven elements are 1 the staff has a high degree of intercommunication 2 the instructional program contains the basic elements of mastery learning 3 the principal is a strong leader with an understanding of curriculum and instruction 4 the staff is stable flexible innovative and skilled 5 the parents are supportive because the school communicates well with them and in some cases community education programs make this possible 6 the superintendent is a leader who communicates clearly the importance of academic achievement and 7 all the parties involved in the teaching learning process know what is expected of them MLF **Improving Schools Through Teacher Development** Stephen E.
