Analyzing Information on Women-Owned Small Businesses in Federal Contracting National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Steering Committee for the Workshop on Women-Owned Small Businesses in Federal Contracting, 2005-04-28 It has been clear for at least 50 years the disadvantages that small businesses face in competing for U S government contracts The Small Business Act of 1953 created the Small Business Administration SBA an independent agency in the executive branch that counsels and assists specific types of small businesses including firms owned by minorities and other socially and economically disadvantaged individuals and firms owned by women Women owned small businesses however are underrepresented or substantially underrepresented in some industries In 2002 the SBA Office of Federal Contract Assistance for Women Business Owners CAWBO organized a draft study containing a preliminary set of approximations of the representation of women owned small businesses in federal prime contracts over 25 000 by industry Because of the past legal challenges to race and gender conscious contracting programs at the federal and local levels the SBA asked the Committee on National Statistics of the National Academies to conduct an independent review of relevant data and estimation methods prior to finalizing the CAWBO study The Steering Committee on Women Owned Small Businesses in Federal Contracting was created and charged with holding a workshop to discuss topics including the accuracy of data and methods to estimate the use of women owned small businesses in federal contracting and the definition of underrepresentation and substantial underrepresentation in designating industries for which preferential contracting programs might be warranted Analyzing Information on Women Owned Small Businesses in Federal Contracting presents the committee s report as well as the recommendations that committees have made *Subcommittee Hearing on Ensuring Small Businesses Have Fair Access to Federal Contracts* United States. Calling the Shots Daniel P. Gitterman,2017-02-14 Modern presidents are CEOs with broad powers over the federal government The United States Constitution lays out three hypothetically equal branches of government the executive the legislative and the judicial but over the years the president as head of the executive branch has emerged as the usually dominant political and administrative force at the federal level In fact Daniel Gitterman tells us the president is effectively the CEO of an enormous federal bureaucracy Using the unique legal authority delegated by thousands of laws the ability to issue executive orders and the capacity to shape how federal agencies write and enforce rules the president calls the shots as to how the government is run on a daily basis Modern presidents have for example used the power of the purchaser to require federal contractors to pay a minimum wage and to prohibit contracting with companies and contractors that knowingly employ unauthorized alien workers Presidents and their staffs use specific tools including executive orders and memoranda to agency heads as instruments of control and influence over the government and the private sector For more than a century they have used these tools without violating the separation of powers *Calling the Shots* demonstrates how each of these executive powers is a powerful weapon of coercion and redistribution in the president s political and policymaking arsenal **U.S. Government Books** ,1985 *The Army Lawyer* ,2001
