Apocalypse And Paradigm Science And Everyday Thinking:

Apocalypse and Paradigm Errol E. Harris, 2000 The influence of scientific paradigms is much more widespread than usually realized According to Harris it permeates the whole of the culture of which science is an integral part The paradigm of Newtonian science was essentially mechanistic and atomistic and thinking in these terms not only penetrated philosophy economics morals and politics for the next three centuries but remains latent in 20th century ways of thought As Harris illustrates the Newtonian paradigm is obsolete in confronting today's global problems While Planck and Einstein introduced a new scientific revolution at the beginning of the century it has yet to be reflected in common habits of thinking It is now urgently necessary to adopt the new conceptual scheme in other fields as it has come to dominate science if global issues are to be resolved A provocative analysis that will be of particular interest to students teachers and policymakers involved with public policy the history of science and philosophy and ethics Amazon com [Global Democracy and Human Self-Transcendence](#) Glen T. Reflections on the Problem of Consciousness Errol E. Harris, 2006-05-07 The relation between body and mind has presented philosophy with its perennial problem It exercised the minds of Plato and Aristotle and it was implicit in the thought if not always present to the minds of the Presocratics In modern philosophy it became explicit in Descartes s Meditations and remained central to the deliberations of every subsequent philosopher of any significance from Hobbes to Hume from Spinoza to Hegel and from Husserl and Heidegger to Russell and Whitehead From whatever angle one approaches philosophy one cannot avoid this problem Moral philosophy both ethical and political compels one to adopt some conception of human nature its origins and status within the world for one cannot decide on the best way to live without considering the impact of natural influences on the human condition and of human behaviour on nature including other humans and these considerations at once raise the question of the relation of the human mind to Nature and the natural body it enlightens A philosophy of Nature must include the place of humanity in the natural scheme not only the human body but also the knowing mind Metaphysics cannot be divorced from Epistemology nor can that neglect the part played in the acquisition of knowledge by the bodily senses And clearly a philosophy of mind must include some vision of the relation of the mind to the body it inhabits

Grier, 2012-02-01 Identity and difference or sameness and otherness are contrasting but interrelated terms that have played an explicit role in the development of Western philosophy at least since Plato wrote the Sophist As Plato pointed out then and Hegel reiterated more recently in his Science of Logic the proper comprehension of these terms and particularly of their interrelation plays a fundamental role in shaping our conception of philosophical reason itself The contributors in this book examine Hegel's treatment of these terms and the role they play in structuring his philosophical system as a whole and also in shaping his conception of dialectical reasoning
