“Torrens” Arthur Bourne

Brooklands Behind The Scenes:

Behind the Scenes in the Vintage Years "Torrens" Arthur Bourne, 2016-12-05 Arthur Bourne was at the centre of British motorcycling from 1923 to 1951. This is his fascinating story. Back in the 1920s there were more motor cyclists than car drivers, records were being broken every month at the Brooklands race track in Surrey, roads were empty and motorbikes constantly broke down. Arthur Bourne, who used the pseudonym Torrens for readers of the best selling weekly *The Motor Cycle*, was in the thick of the game. He had the good luck to be Engineer to The Auto Cycle Union and the then not yet 26 editor of a famous motorcycling journal. This is his story of what it was like to ride hundreds of miles round Britain on reliability trials, essential for manufacturers to claim that their bikes were worth buying and how he provided weekly guidance for thousands of youngsters on two wheels. He writes of Brooklands and of TT races on the Isle of Man, of his encouragement to young engineers like Edward Turner and Phil Vincent and of how in the Second World War he enabled the airborne forces at Arnhem to be equipped with lightweight motorcycles that could be dropped by parachute or flown in by glider. For anyone interested in motorbikes and the people who rode them when British manufacturing was at its apogee, this is a unique testimony. Motor cycles were fashionable. The Duke of York, later to be George VI, and his wife Elizabeth, later known as Queen Elizabeth the Queen Mother, were among the enthusiasts. It was an exciting era, recalled by Torrens near the end of his life in a good journalist's prose. *Behind the Scenes in the Vintage Years* is a unique and fascinating record of an unrepeatable era in British motorcycling and engineering history. It contains many black and white pictures which bring this area of the past to life.

A History of Aviation at Brooklands in 100 Objects Nigel Spooner, 2024-07-30 At the dawn of the twentieth century, mankind had not yet achieved powered flight. The main motive power then was provided by steam engines, heavy, dirty and inefficient. If one wanted to travel overseas, one had to travel on them. A journey from London to New York by steam-driven train and ship took more than 6 days. By the time the same century drew to a close in December 1999, air travel was the normal choice for long journeys. Millions of people every day flew comfortably and safely in pressurised aluminium airliners propelled by simple, clean and efficient gas turbine engines. The same journey from London to New York could be achieved at supersonic speed in less than 6 hours. For much of that century, many of the extraordinary developments that moved aviation from fragile wood and fabric biplanes to supersonic transports were achieved on 330 acres of low-lying former estate farmland in Surrey, England. The estate was called Brooklands. Those marshy acres were transformed from 1907 into the world's first custom-built motor racing circuit, then a rapidly developing aerodrome and finally one of the country's largest aircraft factories, employing tens of thousands of people. Nearly 19,000 aircraft of many different types were built at Brooklands during nine decades of peace and war. By the 1980s, however, it was being eclipsed by larger manufacturing sites elsewhere with longer runways and better communications links. Its owner, by then called British Aerospace, finally closed the factory in 1989. This book tells the history of those amazing developments through 100 of the key aircraft engines, places and

other objects that can still be seen either in or near Brooklands Museum or in other locations around the country It also highlights the stories of six designers whose inspiring creativity produced aircraft engines and weapons ranging from Camel to Concorde Fury to Harrier Wellington to Viscount Merlin to Olympus Between them Thomas Sopwith Barnes Wallis Rex Pierson Sydney Camm Stanley Hooker and George Edwards were responsible for much of what was designed built and flown not only at Brooklands but elsewhere too The book is arranged in successive historical episodes but the many links between the objects and the designers should allow readers to follow different paths if they so wish It is not intended as a technical reference but rather to inspire the reader to seek out the objects and discover more about them **Brooklands** Charles K.
