

The background of the cover is a photograph of the Golden Gate Bridge in San Francisco. The bridge is partially obscured by a thick layer of white fog that fills the lower half of the image. The sky above the fog is a deep, vibrant purple, suggesting a sunset or sunrise. The bridge's iconic towers and suspension cables are visible against the lighter sky.

Bridging Science And Religion

Ted Peters, Gaymon Bennett

Bridging Science And Religion:

Bridging Science and Religion Ted Peters, Gaymon Bennett, This extraordinary volume models a fruitful interaction between the profound discoveries of the natural sciences and the venerable and living wisdoms of the world's major religions. Bridging Science and Religion brings together distinguished contributors to the sciences, comparative philosophy and religious studies to address the most important current questions in the field. Sponsored by the Center for Theology and the Natural Sciences in Berkeley, it is an ideal starting point for novices yet has much to offer academics, professionals and students. Part 1 establishes a working methodology for bridge building between scientific and religious approaches to reality. Part 2 lays down the challenge to current theological and ethical positions from genetics, neuroscience, natural law and evolutionary biology. Part 3 offers a religious response to modern science from scholars working out of Islamic, Jewish, Hindu, Orthodox, Latin American, Catholic and Chinese contexts. Showcasing attitudes toward science from outside the West and an inclusive and comparative perspective, *Bridging Science and Religion* brings a new and timely dimension to this burgeoning field. *Bridging Science and Religion*, 2003

UNFETTERED FAITH! Sam DeLoach, 2010-09-07. Fundamentalist Christian views hold the universe to be between six and seven thousand years old, while most scientists believe it to be between thirteen and fourteen billion years old. Why the great disparity? Most scientists, agnostics and atheists believe in evolution, while many Christians believe anything besides a six-day creation story told in Genesis is sacrilegious. Most who are neither scientifically minded nor religious are seeking answers in an increasingly troubled world and with science and religion so far apart find themselves confused. Which side is right and can the gap between science and religion ever be bridged by the truth? Ignorance, misconception and division frustrate God's will, but understanding, knowledge and wisdom bridges all gaps and unlocks the vast storeroom of UNFETTERED FAITH. *Bridging Science and Religion* Azizan Baharuddin, 2007

Science and Religion (Problems in Theology) Jeff Astley, David Brown, Ann Loades, 2004-11-01. This reader brings together carefully selected material from a wide range of authors on the relationships between science, religion and theology. It samples the recent literature on the challenges to religion posed by both modern physics and evolutionary biology, as well as exploring the relationship between scientific and theological approaches. Topics include models of interaction between science and religion, historical reflections on the conflict thesis, scientific and theological methods, creation and modern cosmology, uncertainty and chaos, creationism and evolutionary theory, the anthropic principle and design, and the challenge of reductionism. Contributors include Ian Barbour, Michael Behe, Richard Dawkins, John Habgood, Mary Hesse, T. H. Huxley, Alister McGrath, Arthur Peacocke, John Polkinghorne, Michael Ruse, Keith Ward, and Fraser Watts.
