Brief History Of Everything:

A Brief History of Everything Ken Wilber, 2007 Told in an accessible and entertaining question and answer format this account examines the course of evolution as the unfolding manifestation of Spirit from matter to life to mind including the higher stages of spiritual development where Spirit becomes conscious of itself

A Short History of Nearly Everything Bill Bryson, 2003-05-06 One of the world's most beloved writers and New York Times bestselling author of *A Walk in the Woods* and *The Body* takes his ultimate journey into the most intriguing and intractable questions that science seeks to answer In *A Walk in the Woods* Bill Bryson trekked the Appalachian Trail well most of it In *A Sunburned Country* he confronted some of the most lethal wildlife Australia has to offer Now in his biggest book he confronts his greatest challenge to understand and if possible answer the oldest biggest questions we have posed about the universe and ourselves Taking as territory everything from the Big Bang to the rise of civilization Bryson seeks to understand how we got from there being nothing at all to there being us To that end he has attached himself to a host of the world's most advanced and often obsessed archaeologists anthropologists and mathematicians travelling to their offices laboratories and field camps He has read or tried to read their books pestered them with questions apprenticed himself to their powerful minds *A Short History of Nearly Everything* is the record of this quest and it is a sometimes profound sometimes funny and always supremely clear and entertaining adventure in the realms of human knowledge as only Bill Bryson can render it Science has never been more involving or entertaining

A Really Short History of Nearly Everything Bill Bryson, 2008-10-28 Bill Bryson's own fascination with science began with a battered old school book he had when he was about ten or eleven years old It had an illustration that captivated him a diagram showing Earth's interior as it would look if you cut into it with a large knife and removed about a quarter of its bulk The idea of lots of startled cars and people falling off the edge of that sudden cliff and 4 000 miles is a pretty long way to fall was what grabbed him in the beginning but gradually his attention turned to what the picture was trying to teach him namely that Earth's interior is made up of several different layers of materials and at the very centre is a glowing sphere of iron and nickel as hot as the Sun's surface according to the caption And he very clearly remembers thinking How do they know that Bill's storytelling skill makes the How and just as importantly the Who of scientific discovery entertaining and accessible for all ages He covers the wonder and mystery of time and space the frequently bizarre and often obsessive scientists and the methods they used and the mind boggling fact that somehow the universe exists and against all odds life came to be on this wondrous planet we call home
