Rereading Marx in the Age of Digital Capitalism Christian Fuchs, 2019-10-20 The end of history has not taken place Ideological and economic crisis and the status quo of neoliberal capitalism since 2008 demand a renewed engagement with Marx But if we are to effectively resist capitalism we must truly understand Marx

Marxism today must theorise how communication technologies media representation and digitalisation have come to define contemporary capitalism There is an urgent need for critical Marxian inspired knowledge as a foundation for changing the world and the way we communicate from digital capitalism towards communicative socialism and digital communism

Rereading Marx in the Age of Digital Capitalism does exactly this Delving into Marx s most influential works such as Capital The Grundrisse Economic and Philosophic Manuscripts The German Ideology and The Communist Manifesto Christian Fuchs draws out Marx s concepts of machinery technology communication and ideology all of which anticipate major themes of the digital age A concise and coherent work of Marxist media and communication theory the book ultimately demonstrates the relevance of Marx to an age of digital and communicative capitalism **Digital Demagogue** Christian Fuchs,2018-02-20

From Covfefe to FraudNewsCNN and FakeNews Donald Trump s tweets have caused an international frenzy He is a reality TV and Twitter President who uses digital and entertainment culture as an ideological weapon as an expression of his authoritarianism This book delves into new political economic structures as expressed through political communication to explain the rise of authoritarian capitalism nationalism and right wing ideology throughout the world Christian Fuchs does this through updating Marxist theory and the Frankfurt School s critical theory He re invigorates the works on authoritarianism of Franz L Neumann Theodor W Adorno Erich Fromm Herbert Marcuse Max Horkheimer Wilhelm Reich Leo Lowenthal and Klaus Theweleit in the age of Trump and Twitter In the age of big data and social media Digital Demagogue studies the expressions of ideology nationalism and authoritarianism today and discusses prospects for overcoming capitalism and renewing the Left **Strategic Management in the 21st Century** Timothy J. Wilkinson,Vijay R. Kannan,2013-05-22

Covering both practical and theoretical aspects of strategic management this three volume work brings the complex topic down to earth and enables readers to gain competitive business advantages in their marketplace This clear insightful and interesting work covers all aspects of strategic management including chapters that discuss SWOT Strengths Weaknesses Opportunities and Threats analysis the Resource Based View transaction cost economics and real options theory Unlike other books this three volume work examines strategic management from different perspectives effectively interweaving seemingly disparate subdisciplines such as entrepreneurship and international business with specialized foci such as creativity innovation and trust Incorporating information from contributors as varied as a proprietor of a worldwide motorcycle business to one of the most published scholars in the field of international strategic management the practical and theoretical perspectives presented in Strategic Management in the 21st Century will benefit business strategists professors of strategic management and graduate students in the field **Cascades of Violence** John Braithwaite,Bina D'Costa,2018-02-01

As in the cascading of water violence and nonviolence can cascade down from commanding heights of power as in waterfalls up from powerless peripheries and can undulate to spread horizontally flowing from one space to another As with containing water conflict cannot be contained without asking crucial questions about which variables might

cause it to cascade from the top down bottom up and from the middle out The book shows how violence cascades from state to state Empirical research has shown that nations with a neighbor at war are more likely to have a civil war themselves Sambanis 2001 More importantly in the analysis of this book war cascades from hot spot to hot spot within and between states Autesserre 2010 2014 The key to understanding cascades of hot spots is in the interaction between local and macro cleavages and alliances Kalyvas 2006 The analysis exposes the folly of asking single level policy questions like do the benefits and costs of a regime change in Iraq justify an invasion We must also ask what other violence might cascade from an invasion of Iraq The cascades concept is widespread in the physical and biological sciences with cascades in geology particle physics and the globalization of contagion The past two decades has seen prominent and powerful applications of the cascades idea to the social sciences Sunstein 1997 Gladwell 2000 Sikkink 2011 In his discussion of ethnic violence James Rosenau 1990 stressed that the image of turbulence developed by mathematicians and physicists could provide an important basis for understanding the idea of bifurcation and related ideas of complexity chaos and turbulence in complex systems He classified the bifurcated systems in contemporary world politics as the multicentric system and the statecentric system Each of these affects the others in multiple ways at multiple levels and in ways that make events enormously hard to predict Rosenau 1990 2006 He replaced the idea of events with cascades to describe the event structures that gather momentum stall reverse course and resume anew as their repercussions spread among whole systems and subsystems 1990 299 Through a detailed analysis of case studies in South Asia that built on John Braithwaite s twenty five year project Peacebuilding Compared and coding of conflicts in different parts of the globe we expand Rosenau s concept of global turbulence and images of cascades In the cascades of violence in South Asia we demonstrate how micro events such as localized riots land grabbing pervasive militarization and attempts to assassinate political leaders are linked to large scale macro events of global politics We argue in order to prevent future conflicts there is a need to understand the relationships between history structures and agency interest values and politics global and local factors and alliances
