## **Abbot Suger And Saint Denis A Symposium:**

**Abbot Suger and Saint-Denis** Paula Lieber Gerson, 1986 Suger abbot of the French abbey of Saint Denis lived from 1081 to 1151 This book of essays about his life and achievements grew out of a symposium sponsored by the International Center of Medieval Art and by Columbia University For the symposium twenty three medieval scholars from all parts of the world representing a wide range of humanistic disciplines were brought together to discuss the varied nature of Suger's activities Suger has been best known for his contributions as a patron of art and architecture As the essays in this volume devoted to Suger's political activities and historical writings demonstrate he was in addition to being a brilliantly innovative patron of architecture an important architect of the French state Only by bringing together differing humanistic perspectives on Suger and Saint Denis has it been possible to achieve for the first time a fully rounded appreciation of a man who was at the same time a patron of the arts and literature a politician who adroitly used his ecclesiastical position to enhance the growth and power of the monarchy and a churchman consistently devoted to the promotion of the cult of Saint Denis the patron saint of his abbey and of France From publisher's description Abbot Suger and Saint-Denis Paula Lieber

Gerson, 1986 **ABBOT SUGER AND SAINT-DENIS.** Paula Lieber Gerson, 1986 The Responsories and Versicles of the Latin Office of the Dead Knud Ottosen, 2008-01-25 It may seem astonishing to some that there is a need for reprinting a 14 year old dissertation but the fact is that the book is exactly as relevant to scholars today as it was in 1993 It still represents the world's largest database to compare the responsories of the Office of the Dead in more than 2 000 sources Since the order of these responsories differed from church to church this order can be used to localize medieval and Renaissance liturgical books The book is therefore an absolute necessity for everyone who conducts research on the area it covers Put differently the book reveals the geography of the concept of death in Europe from the 9th 16th centuries from a theological liturgical ecclesiastical musical and political perspective seen from one particular liturgical office The Office of the Dead

*The Grove Encyclopedia of Medieval Art and Architecture* Colum Hourihane, 2012 This volume offers unparalleled coverage of all aspects of art and architecture from medieval Western Europe from the 6th century to the early 16th century Drawing upon the expansive scholarship in the celebrated Grove Dictionary of Art and adding hundreds of new entries it offers students researchers and the general public a reliable up to date and convenient resource covering this field of major importance in the development of Western history and international art and architecture *Abbatial Authority and the Writing of History in the Middle Ages* Benjamin Pohl, 2023-08-22 This book argues that abbatial authority was fundamental to monastic historical writing in the period c 500 1500 Writing history was a collaborative enterprise integral to the life and identity of medieval monastic communities but it was not an activity for which time and resources were set aside routinely Each act of historiographical production constituted an extraordinary event one for which singular provision had to be made workers and materials assigned time carved out from the monastic routine and licence granted This allocation of human and

material resources was the responsibility and prerogative of the monastic superior Drawing on a wide and diverse range of primary evidence gathered from across the medieval Latin West this book is the first to investigate systematically how and why abbots and abbesses exercised their official authority and resources to lay the foundations on which their communities historiographical traditions were built by themselves and others It showcases them as prolific authors patrons commissioners project managers and facilitators of historical narratives who not only regularly put pen to parchment personally but also and perhaps more importantly enabled others inside and outside their communities by granting them the resources and licence to write Revealing the intrinsic relationship between abbatial authority and the writing of history in the Middle Ages with unprecedented clarity Benjamin Pohl urges us to revisit and revise our understanding of monastic historiography its processes and its protagonists in ways that require some radical rethinking of the medieval historian s craft in communal and institutional contexts *New Approaches to Medieval Architecture* Robert Bork,William W. Clark,Abby

McGehee,2016-12-05 This collection of essays presents the exciting and innovative work being done in the field of medieval architectural history by scholars affiliated with AVISTA one of the most active sponsors of such research in the Anglo American scholarly community These studies constitute a snapshot of the range of new interpretive strategies being deployed by researchers in the reassessment of previous scholarship and identification of new modes of inquiry In recent years the study of medieval architecture has been transformed by the emergence of new critical perspectives and new technologies The contributors to this book are among those at the forefront of these developments Several of the essays present dramatic reinterpretations of canonical monuments including the Abbey of Saint Denis Beauvais Cathedral and Notre Dame in Paris Others consider broader methodological issues such as the applications of geometry workshop practice and the shaping of historical narratives Still others demonstrate how high tech scanning and visualization methods can enhance our understanding of construction methods and the behavior of buildings The publication of this collection of pioneering essays should foster further exploration by clarifying the state of research by establishing specific historical arguments and by providing models of inquiry to inspire emerging scholars **Routledge Revivals: Medieval France (1995)** William W.
