Abortion In Psychosocial Perspective Trends In Transnational Research:

Abortion in Psychosocial Perspective, 1978 *Abortion in Psychosocial Perspective* Henry Philip David, 1978 *Medical and Psychological Impact of Abortion* United States. Congress. House. Committee on Government Operations. Human Resources and Intergovernmental Relations Subcommittee, 1989 Abortion and Sterilization Jane E. Hodgson, 2014-05-12

Abortion and Sterilization Medical and Social Aspects investigates the medical and social aspects of abortion and sterilization. Its aim is to legitimate abortion and sterilization for the sake of those who need and seek the service. The best techniques are presented in the proper medical perspective. The social and political history, epidemiology and public health aspects of abortion and sterilization are also discussed. Comprised of 23 chapters, this book begins with a review of abortion legislation and practices in historical perspective amidst changing sociocultural contexts in diverse geographic areas. Liberalization trends are surveyed chronologically in terms of selected highlights demonstrating legislative progress and frustrations along with advances in abortion technology. A classified listing of abortion statutes and/or court decisions in 140 countries is given. Subsequent chapters deal with the epidemiology of induced abortion, abortions for teenagers, the link between abortion and mental health, and hysterectomy and vasectomy as abortion techniques. Vasectomy as a family planning option is also examined. This monograph is intended for students, teachers, clinicians, research workers, administrative and nursing personnel and those with interest in reproductive control.

Abortion Ruth Porter, Maeve O'Connor, 2009-09-14. The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology, chemistry and medicine assembled to present papers and discuss results. The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world.

Complications of Abortion World Health Organization, 1995. Sets out guidelines that can help reduce the high levels of maternal morbidity and mortality associated with abortion, whether spontaneous or induced. Recommendations and advice are backed by extensive practical experience and rooted in the principle that emergency care for the complications of abortion should be available 24 hours a day in every health care system. In view of the need to prevent life-threatening complications, the book also establishes standards of safe abortion practice for use in those countries where abortion is permitted by law. Prevention of abortion through education and family planning is likewise discussed. Addressed to health managers, administrators and care providers, the book follows a step-by-step approach to the provision of emergency and preventive care. The first three chapters describe the magnitude of mortality and morbidity caused by unsafe abortions, define the essential components of abortion care at each level in the health system and discuss the ways in which legal and societal factors affect abortion behaviour and care. Against this background, the remaining eleven chapters provide technical and managerial guidelines for each component of service at each level of the health system needed to ensure that all women have access to care 24 hours a day. A chapter on planning is followed by three chapters outlining the clinical elements of

emergency abortion care Of particular value is a chapter on patient information and counselling which emphasizes the importance of providing information in a supportive manner Other chapters offer detailed guidance on the facilities equipment and drugs needed for abortion care on the training and supervision of staff and on ways to overcome several obstacles that make it difficult for women in remote rural areas to receive timely care **National Library of Medicine**

Second-Trimester Abortion G. Berger,W.E. Brenner,L.G. Keith,2012-12-06 Irvin M Cushner MD MPH It is both remarkable and at the same time a sign of this era of rapid change that one can refer back to the infancy of a field which has existed for barely more than a decade Yet one now reads of the maturing of the family planning and abortion fields both of which were incorporated into our society and integrated into our health care system within the past ten years Indeed in the very year that this book is being prepared we note the tenth anniversaries of several significant events of 1970 1 the enactment of Title X of the Public Health Service Act establishing a Federal program in family planning 2 the first issuance by a major health related organization the APHA of a policy statement advocating repeal of all abortion laws and 3 the enactment by New York State of an abortion law whose only restriction was that it be performed by a licensed physician and the subsequent action the first by any local health department New York City to assure both its implementation and its quality They were indeed eventful days These three events seemed to presage a then unprecedented acceptance of fertility regulation as a right and as a needed service
