Bureaucratic Elites in Western European States Edward C. Page, Vincent Wright, 1999-12-09 *Bureaucratic Elites in Western European States* provides valuable information about the structures and composition of the higher civil service and its position in the political structure through a comparative analysis of Britain France Germany Italy Spain Belgium the Netherlands Austria Greece Denmark and Sweden The book explores how higher civil service has developed in the light of the massive changes in European societies in the past thirty years Changes include the size of the top level of the civil service the growing social diversity of its ranks and well as the tendency to recruit from outside the civil service The book also examines how wider social changes such as the democratisation of education the growth of interest groups and the increasing importance of the European Union impact on the higher levels of bureaucracy producing similar patterns of change throughout Europe

The European Commission and the Integration of Europe Liesbet Hooghe, 2001 What kind of European Union do top Commission officials want Should the European Union be supranational or intergovernmental Should it promote market liberalism or regulated capitalism Should the Commission be Europe's government or its civil service This 2002 book examines top officials preferences on these questions through analysis of unique data from 137 interviews Understanding the forces that shape human preferences is the subject of intense debate Hooghe demonstrates that the Commission has difficulty shaping its employees preferences in the fluid multi institutional context of the European Union Top officials preferences are better explained by experiences outside rather than inside the Commission political party country and prior work leave deeper imprints than directorate general or cabinet Preferences are also influenced more by internalized values than by self interested career calculation Hooghe's findings are surprising and will challenge a number of common assumptions about the workings and motives of the European Commission

Prime Ministers in Greece Kevin Featherstone, Dimitris Papadimitriou, 2015-07-09 This book is concerned with a large question in one small but highly problematic case how can a prime minister establish control and coordination across his or her government The Greek system of government sustains a paradox of power at its very core The Constitution provides the prime minister with extensive and often unchecked powers Yet the operational structures processes and resources around the prime minister undermine their power to manage the government Through a study of all main premierships between 1974 and 2009 Prime Ministers in Greece argues that the Greek prime minister has been an emperor without clothes The costs of this paradox included the inability to achieve key policy objectives under successive governments and a fragmented system of governance that provided the backdrop to Greece's economic meltdown in 2010 Building on an unprecedented range of interviews and archival material Featherstone and Papadimitriou set out to explore how this paradox has been sustained They conclude with the Greek system meeting its nemesis the arrival of the close supervision of its government by the Troika the representatives of Greece's creditors The debt crisis challenged taboos and forced a self reflection It remains unclear however whether either the external strategy or the domestic response is likely to be sufficient to make the Greek system of governance fit for purpose
