2025 Edition Digital Productivity:

Jidoka in the Digital Age Mohammed Hamed Ahmed Soliman, 2025-09-17 Jidoka Toyota's principle of automation with a human touch is one of the two pillars of the Toyota Production System. While Just in Time has been widely adopted, Jidoka has often remained misunderstood, underutilized, or oversimplified. This book brings Jidoka to life for today's world of Industry 4.0, smart factories, and digital transformation. In this expanded and updated second edition, Mohammed Hamed Ahmed Soliman revisits his original 2020 work and integrates the latest advances that are reshaping quality management: artificial intelligence, machine vision, predictive maintenance, and digital twins. The result is a practical, modern guide to building defect-free processes that withstand the challenges of complexity, disruption, and global competition. What you'll learn in this edition: The two concepts of Jidoka: separating man from machine and building quality into the process; How Toyota balances productivity and quality using andon systems, buffers, and culture; Modern applications of Jidoka with AI, IoT, and Industry 4.0; Case studies from healthcare, logistics, services, and digital industries; How to apply tools like FMEA, root cause analysis, and A3 problem solving in today's digital environment; Lessons from Toyota's recalls and the rising cost of quality in the EV and software-driven era; Why this book: Practical, clear frameworks, checklists, and tools you can apply immediately; Modern, updated for 2025 realities: AI, smart factories, and global supply chains; Universal examples across industries from manufacturing to healthcare to software; Whether you are a Lean practitioner, engineer, quality professional, or business leader, this book will help you understand Jidoka in depth and apply it to create resilient, defect-free systems in the digital age. About the Author: Mohammed Hamed Ahmed Soliman is a professor, consultant, and author of over a dozen books on Lean, operational excellence, and industrial systems. His works, including *Lean Maintenance*, *Toyota's Advanced GD Method*, and *Heijunka: The Leveling Art of the Japanese Automaker*, are used by engineers and leaders worldwide.

Designing Instruction with Generative AI Brent A. Anders, 2025-09-16 *Designing Instruction with Generative AI* offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences. While instructional designers are a tremendous asset to higher education, not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations. Drawing on a wealth of research, professional experience, and strategic insights, this book equips new and seasoned teaching faculty and trainers with step-by-step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners. Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials, course design, and learning environments while supporting their digital literacies. Rather than introduce AI as a means of outsourcing subject area expertise, critical thinking, or cognitive processes, the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices. From optimizing course alignment and accessibility practices to fostering active learning

motivation and engagement educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license ,
