Air Force Spoken Here General Ira Eaker And The Command Of The Air:

"Air Force Spoken Here" James Parton,2000 **James Parton "Air Force Spoken Here" General Ira Eaker and the Command of the Air** ,2000 It was my good fortune to land on General Eaker s staff in England very early in World War II May 1942 Initially in intelligence I became his aide and confidant throughout the war and then his friend and associate in many matters during the subsequent years The closeness of our relationship as well as his gift for cloaking human sentiment with sardonic humor are evident in his reply when I asked him in 1950 if he would be best man at my wedding Jimmy since you were my aide for almost four years it seems only fair that I should be yours for a few hours Thirty three years later Lt Gen John B McPherson then president of the Air Force Historical Foundation of which I am a trustee surprised me with the suggestion that I write Eaker s biography Since I had given up the hard and more gregarious duties of a publisher I was dubious at first But I agreed because I concluded that Eaker richly deserves a biography both to commemorate his career as a remarkable commander and as America s most articulate spokesman for the responsible use of air power **Concepts for Air Force Leadership** ,1990 Targeting the Third Reich Robert S. Ehlers,2009 Argues that air intelligence played a crucial but largely overlooked role in the successful execution of the Allied bombing campaigns against the Third Reich which in turn proved a decisive factor in both ending the war in Europe and ending it as soon as it did *Fighting from Above* Brian D. Laslie,2024-03-19 The story of the United States Air Force USAF stretches back to aerial operations prior to the First World War well before the USAF became a separate service and looks forward to a new era of airpower in space *Fighting from Above* presents a concise account of this expansive history offering a new perspective on how the air forces of the United States created an independent way of warfare over time From the earliest battles of the USAF s predecessor organizations to its modern incarnation Brian D Laslie identifies four distinct and observable ways of war that developed over four distinct epochs Beginning with the development of early air power 1906 1941 he highlights the creation of roles and missions with bombardment theory and practice ascendant An era of strategic dominance 1942 1975 followed in which the ideas of strategic bombardment ruled the air force when such notions were unceremoniously proven false during the Vietnam era conflicts a period of tactical ascendancy 1975 2019 began Finally Laslie considers the current environment where much of the story of the USAF remains unwritten as it grapples with the prospects and challenges posed by drones and the U S Space Force While detailing combat operations *Fighting from Above* also pays close attention to technology politics rivalries logistics policy organization equipping and training Thorough concise and innovative in its approach it is an authoritative exceptionally readable history of the development of American airpower **Basic Aerospace Doctrine of the United States Air Force** Dennis M. Drew,1992 **Strategic Review** ,1986 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States *Air University Library Index to Military Periodicals* ,1986 **Rise of the War Machines** Raymond Patrick O'Mara,2022-03-15

Rise of the War Machines The Birth of Precision Bombing in World War II examines the rise of autonomy in air warfare from the inception of powered flight through the first phase of the Combined Bomber Offensive in World War II Raymond P O Mara builds a conceptual model of humans machines and doctrine that demonstrates a distinctly new way of waging warfare in human machine teams Specifically O Mara examines how the U S Army s quest to control the complex technological and doctrinal system necessary to execute the strategic bombing mission led to the development of automation in warfare Rise of the War Machines further explores how the process of sharing both physical and cognitive control of the precision bombing system established distinct human machine teams with complex human to human and human to machine social relationships O Mara presents the precision bombing system as distinctly socio technical constructed of interdependent specially trained roles the pilot navigator and bombardier purpose built automated machines the Norden bombsight specialized navigation tools and the Minneapolis Honeywell C 1 Autopilot and the high altitude daylight bombing doctrine all of which mutually shaped each other s creation and use *USAF Strategic Air Warfare* Richard H. Kohn, United States Air Force Office of Air Force History, 2023-01-27 Military history helps provide a realistic perspective on warfare Through the study of past events we gain insight into the capabilities of armed forces and most importantly a sound knowledge of the policies strategies tactics doctrine leadership and weapons that have produced success in battle Each of us in broadening our knowledge of air power s past helps to maintain the most effective Air Force possible now and in the future Foreword Early in June 1984 some thirty five of the retired four star generals of the United States Air Force gathered in Washington D C for the annual Senior Statesmen Conference Each year since the early 1960s the Air Force has invited its retired four star generals to Washington From that group in 1984 the Office of Air Force History invited four general officers Generals Curtis E LeMay Leon W Johnson David A Burchinal and Jack J Catton to participate in a group oral interview on the history of strategic air warfare They accepted and on June 15 1984 at Bolling Air Force Base the four discussed for nearly three hours the development and evolution of strategic air warfare Because the session ended without time for a discussion of the Cuban Missile Crisis and the Vietnam War the four conferred again this time by telephone to discuss these and other issues not considered earlier This interview was the third in a series begun by the Office of Air Force History with the senior statesmen the first in 1982 covering air superiority in World War II and Korea the second in 1983 discussing the type of aerial interdiction used in World War II Korea and Vietnam
