Anzus Crisis Nuclear Visiting And Deterrence:

The ANZUS Crisis, Nuclear Visiting and Deterrence Michael Pugh, 1989 The development of nuclear weapons has been a critical problem for the NATO alliance In the Pacific a region of increasing strategic interest for the United States and Soviet Union nuclear weapons have been an environmental concern since the bombing of Hiroshima and Nagasaki Opposition to nuclear tests has now been taken a step further with the creation of a South pacific Nuclear Free Zone and the decision by a New Zealand Government to ban port visits by vessels believed to be carrying nuclear weapons New Zealand s proposal to back its policy with legislation had been seen by the Reagan and Thatcher administrations as a threat to the principle of neither confirm nor deny the presence of nuclear weapons on vessels This 1989 study examines the questions of principle at issue the evolution of the ANZUS crisis its implications for the Western alliance structure as a whole and the degree to which the nuclear free virus in the South Pacific might be catching

Asia, the US and Extended Nuclear Deterrence Andrew O'Neil, 2013-09-02 Since the end of the Cold War significant attention has focussed on the issue of nuclear deterrence and in particular whether formal nuclear security guarantees from nuclear weapons states to non nuclear weapons states involving the possible use of nuclear weapons have a place in the twenty first century global strategic landscape Growing support for nuclear disarmament in the US and elsewhere has seen serious doubts being raised about the ongoing utility of extended nuclear deterrence This book provides the first detailed analysis of the way in which extended nuclear deterrence operates in contemporary Asia It addresses the following key questions What does the role of extended nuclear deterrence in Asia tell us about the broader role of extended nuclear deterrence in the contemporary international system Is this role likely to change significantly in the years ahead O Neil uses a theoretical and historical framework to analyse the contemporary and future dynamics of extended nuclear deterrence in Asia and challenges many of the existing orthodox perspectives on the topic Providing a new perspective on debates surrounding extended nuclear deterrence this book will be of interest not only to students and scholars of Asian politics international relations and security studies but also to policy makers and professionals

Strategic Review , 1990 dedicated to the advancement and understanding of those principles and practices military and political which serve the vital security interests of the United States *Contracting States* Alexander Cooley, Hendrik Spruyt, 2009-05-10 From the middle of the 20th century the cessation of sovereignty either partial or complete has become a commonplace of international relations This volume examines how states divide transfer sovereignty functions in particular how incomplete contracts have come to assume a central role in the process Environmentalism and Global International Society Robert Falkner, 2021-07-15 Environmentalism and Global International Society reveals how environmental values and ideas have transformed the normative structure of international relations Falkner argues that environmental stewardship has become a universally accepted fundamental norm or primary institution of global international society He traces the history of environmentalism s rise from a loose set of ideas originating in the nineteenth century to a globally applicable norm in the

twentieth century which has come to redefine international legitimacy and states global responsibilities He shows how this deep norm change came about as a result of the interplay between non state and state actors and how the new environmental norm has interacted with the existing primary institutions of global international society most notably sovereignty and territoriality diplomacy international law and the market This book shifts the attention from the presentist focus in the study of global environmental politics to the longue dur e of global norm change in the greening of international relations

Domestic Society and International Cooperation Jeffrey W. Knopf, 1998-05-13 In this book Jeffrey Knopf investigates domestic sources of state preferences about whether to seek cooperation with other countries on security issues He does so by examining whether public protest against nuclear weapons influenced US decisions to enter strategic arms talks The analysis builds on the domestic structure approach to explaining foreign policy using it as the starting point to develop a new framework with which to trace the influence of societal actors The book s finding that protest had a major impact suggests that prevailing conceptions of the relation between domestic politics and international cooperation need to be broadened Existing approaches typically assume that state preferences are set by political leaders or powerful interests thereby treating the rest of society only as a constraint on state action In contrast this book demonstrates that ordinary citizens can also serve as a direct stimulus to the development of a state interest in cooperation

Trust in International Cooperation Brian C. Rathbun, 2011-12-01 Trust in International Cooperation challenges conventional wisdoms concerning the part which trust plays in international cooperation and the origins of American multilateralism Brian C Rathbun questions rational institutionalist arguments demonstrating that trust precedes rather than follows the creation of international organizations Drawing on social psychology he shows that individuals placed in the same structural circumstances show markedly different propensities to cooperate based on their beliefs about the trustworthiness of others Linking this finding to political psychology Rathbun explains why liberals generally pursue a more multilateral foreign policy than conservatives evident in the Democratic Party s greater support for a genuinely multilateral League of Nations United Nations and North Atlantic Treaty Organization Rathbun argues that the post World War Two bipartisan consensus on multilateralism is a myth and differences between the parties are growing continually starker

Governance Without Government James N. Rosenau, Ernst-Otto Czempiel, 1992-03-26 A world government capable of controlling nation states has never evolved but governance does underlie order among states and gives direction to problems arising from global interdependence This book examines the ideological bases and behavioural patterns of this governance without government

Uncertainty and Its Discontents Peter J. Katzenstein, 2022-07-07 This volume considers worldviews as foundational concepts for world politics

Bureaucracies at War Tyler Jost, 2024-06-27 Rethinks how bureaucracy shapes foreign policy miscalculation is less likely when political leaders can extract quality information from the bureaucracy
