

FRANS DE WAAL

"A remarkable journey of discovery to the heart of a profound question: What can we learn about the evolution of our own cultures by studying the behavior of our primate cousins? A deftly written, deeply reflective work."

Ape And The Sushi Master Cultural Reflections By A Primatologist:

The Ape And The Sushi Master Frans De Waal, 2008-08-05 From the New York Times bestselling author of *Mama's Last Hug* and *Are We Smart Enough to Know How Smart Animals Are* a provocative argument that apes have created their own distinctive cultures In *The Ape and the Sushi Master* eminent primatologist Frans de Waal corrects our arrogant assumption that humans are the only creatures to have made the leap from the natural to the cultural domain The book's title derives from an analogy de Waal draws between the way behavior is transmitted in ape society and the way sushi making skills are passed down from sushi master to apprentice Like the apprentice young apes watch their group mates at close range absorbing the methods and lessons of each of their elders actions Responses long thought to be instinctive are actually learned behavior de Waal argues and constitute ape culture A delightful mix of intriguing anecdote rigorous clinical study adventurous field work and fascinating speculation *The Ape and the Sushi Master* shows that apes are not human caricatures but members of our extended family with their own resourcefulness and dignity

The Ape and the Sushi Master Frans B. M. de Waal, Frans de Waal, 2001 Primatologists Frans de Waal has published a number of books on chimpanzee behaviour including *Peacemaking Among Primates* In *The Ape and The Sushi Master* the author continues his explorations of human and primate culture in order to arrive at a better understanding of the roots of human behaviour De Waal's study examines whether animals learn from one another and have what he defines as culture or whether their actions are purely based on genetics and instinct

Evolution, Culture, and the Human Mind Mark Schaller, Ara Norenzayan, Steven J. Heine, Toshio Yamagishi, Tatsuya Kameda, 2011-03-17 *Evolution Culture and the Human Mind* is the first scholarly book to integrate evolutionary and cultural perspectives on human psychology The contributors include world renowned evolutionary cultural social and cognitive psychologists These chapters reveal many novel insights linking human evolution to both human cognition and human culture including the evolutionary origins of cross cultural differences

Animals and Society Margo DeMello, 2012-08-21 Considering that much of human society is structured through its interaction with non human animals and since human society relies heavily on the exploitation of animals to serve human needs human animal studies has become a rapidly expanding field of research featuring a number of distinct positions perspectives and theories that require nuanced explanation and contextualization The first book to provide a full overview of human animal studies this volume focuses on the conceptual construction of animals in American culture and the way in which it reinforces and perpetuates hierarchical human relationships rooted in racism sexism and class privilege Margo DeMello considers interactions between humans and animals within the family the law the religious and political system and other major social institutions and she unpacks the different identities humans fashion for themselves and for others through animals Essays also cover speciesism and evolutionary continuities the role and preservation of animals in the wild the debate over zoos and the use of animals in sports domestication agricultural practices such as factory farming vivisection animal cruelty animal activism the

representation of animals in literature and film and animal ethics Sidebars highlight contemporary controversies and issues with recommendations for additional reading educational films and related websites DeMello concludes with an analysis of major philosophical positions on human social policy and the future of human animal relations **America's Darwin** Tina Gianquitto, Lydia Fisher, 2014 An engaging collection of interdisciplinary essays on the distinctive qualities of America's textual engagement with Darwinian evolutionary theory especially in regard to *On the Origin of Species* which highlights the influence of prevalent cultural anxieties on interpretation **Social Information Transmission and Human Biology**

Jonathan CK Wells, Simon Strickland, Kevin Laland, 2006-05-22 Recent research has emphasized that socially transmitted information may affect both the gene pool and the phenotypes of individuals and populations and that an improved understanding of evolutionary issues is beneficial to those working towards the improvement of human health In response to a growing interest across disciplines for information regarding the contribution of social behavior to a range of biological outcomes *Social Information Transmission and Human Biology* connects the work of evolutionary theorists and those dealing with practical issues in human health and demographics Combining evolutionary models with biomedical research authors from various disciplines look at how human behavior influences health and how reproductive fitness sheds light on the processes that shaped the evolution of human behavior Both academic and medical researchers will find much useful insight in this text *Posthumanist Shakespeares* S. Herbrechter, I. Callus, 2012-07-31 Shakespeare scholars and cultural theorists

critically investigate the relationship between early modern culture and contemporary political and technological changes concerning the idea of the human The volume covers the tragedies *King Lear* and *Hamlet* in particular but also provides posthumanist readings of other Shakespearean plays **War, Peace, and Human Nature** Douglas P. Fry, 2015-02 The chapters in this book posit that humans clearly have the capacity to make war but since war is absent in some cultures it cannot be viewed as a human universal And counter to frequent presumption the actual archaeological record reveals the recent emergence of war It does not typify the ancestral type of human society the nomadic forager band and contrary to widespread assumptions there is little support for the idea that war is ancient or an evolved adaptation Views of human nature as inherently warlike stem not from the facts but from cultural views embedded in Western thinking Amazon.com

Watching Giants Elin Kelsey, 2009 In *Watching Giants: The Secret Lives of Whales* Elin Kelsey provides an in depth look into one of the world's most magnificent creatures I'm sure these stories will amaze and inspire you as they did me A joy to read Jane Goodall PhD DBE Founder The Jane Goodall Institute UN Messenger of Peace *Watching Giants* is a wonderful book about animals whose complex social relationships and deep emotional lives are difficult to observe and even more difficult to understand I know for certain that after reading this book others will learn as much about whales and their underwater environment as I did from traveling with Elin Kelsey Marc Bekoff author of *The Emotional Lives of Animals* *Animals Matter* and *Wild Justice: The Moral Lives of Animals* Prepare to be immersed in a different world Like sitting down to a long dinner

with a delightful and erudite friend who is about to tell you everything you need to know about the ocean this absorbing book will let you see the ocean and its creatures in a way that you never imagined possible Jeffrey Moussaieff Masson author of *When Elephants Weep* *The Emotional Lives of Animals* *Watching Giants* reads like dispatches from the frontiers of marine science covering everything from homosexuality in dolphins to whale intelligence culture and conservation with extraordinary insight Superbly written and highly recommended Erich Hoyt Senior Fellow Whale and Dolphin Conservation Society and author of *Creatures of the Deep* *Animals in the Sociologies of Westermarck and Durkheim* Salla Tuomivaara, 2019-09-04 This book explores why animals at some point disappeared from the realm and scope of sociology The role of sociology in the construction of a science of the human has been substantial building representations of the human sphere of life as unique Within the sociological tradition however animals have often been invisible even non existent Through in depth comparisons of the texts of prominent early sociologists Emile Durkheim and Edward Westermarck Tuomivaara shows that despite this exclusion representations of animals and human animal relations were far more varied in early works than in the later sociological cannon Addressing a significant gap in the interdisciplinary field of animal studies Tuomivaara presents a close reading of the historical treatment of animals in the works of Durkheim and Westermarck to determine how the human animal boundary was established in sociological theory The diverse forms in which animals and the animal appear in the works of early classical sociology are charted and explored alongside the sociological themes that bring animals into these texts Situated in contemporary theory from critical animal studies to posthumanism this important book lays the groundwork for a disciplinary shift away from this sharp human animal dualism
