Aperture 116 Photostroik:

Exposure Jeff Revell, 2014 Starts with the basics of light including how it works and how to see it In order to leverage this new understanding of light in your photography Jeff walks the reader through one of the most important photographic principles the exposure triangle ISO shutter speed and aperture Learning to apply these three elements together is the gateway to both technical and creative control of your photography The book covers all key camera features that affect exposure regardless of what type of DSLR you have including Aperture Priority mode Shutter Priority mode and Exposure Compensation *Aperture* Robert Adams, R. H. Cravens, Peter Steinhart, 1981-01-01 Reproduces the work singly and in collection of well known and beginning photographers and prints commentaries on individual photographers photographic theory and practice and related topics *Aperture* Raymond Depardon, 1982 *Understanding Exposure, 3rd Edition* Bryan Peterson, 2010-12-21 With more than 350 000 copies sold Understanding Exposure has demystified the complex concepts of exposure for countless photographers Now updated with current technologies more than one hundred new images and an all new chapter this new edition will inspire you more than ever to free yourself from auto and create the pictures you truly want In his trademark easy to understand style author Bryan Peterson explains the relationship between aperture and shutter speed including how to achieve successful exposures in seemingly difficult situations You ll learn Which aperture gives you the greatest contrast and sharpness and when to use it Which apertures guarantee the background remains an out of focus tone Which one aperture when combined with the right lens creates an area of sharpness from three feet to infinity How to creatively use shutter speed to either freeze an action or imply motion Where to take a meter reading when shooting a sunset snow or a city at dusk With new information on white balance flash HDR and more this updated classic will inspire you to stop guessing and take control of your settings for better photos anytime anywhere and with any camera *Extreme Exposure* David Nightingale, 2010 A guide to creating high impact photography by adjusting aperture and shutter speed that covers technical considerations ultra long and ultra short shutter speeds and ultra wide and ultra small apertures and provides sample photographs *The Significance of the Aperture (f Stop) in Photography* Raymond A. Mazan, 1957 *Aperture* Melissa Harris, 2009-11 Edited by Melissa Harris *Aperture Masters of Photography Series* Dorothea Lange, 1987-10-01 **Aperture** , 1984 **Photo-Graphics: Exposure** David Taylor, 2017-04 One of the most over used yet misunderstood pieces of photographic equipment is the flash unit in its many forms While a flash unit either built in to the camera or a separate device offers the advantage of adding light to your images its biggest disadvantage is the complex nature of the flash which prevents many from using it to its full potential Seeking an understanding of the nomenclature the buttons and dials on the flash itself and the menus inside is akin to trying to learn a foreign language What is FEC What does TTL mean and how is it used effectively What is high speed synchronisation How can the less technically gifted photographer understand the complexities of such systems and put them to effective use in the field Studying a manual

full of technical jargon is a daunting task and just as confusing as the flash itself Professional photographer Robert Harrington takes the confusion out of the subject of photographic lighting and offers invaluable guidance and expert tips that will benefit all keen photographers Jargon free text explains basics of flash both on and off camera how to utilise direct and bounce flash the basics of off camera flash how to take great portraits with a single Speedlight the use of off camera flash modifiers such as softboxes and grids the creative employment of Speedlights including use outdoors AUTHOR Bob Harrington is an accomplished headshot and editorial photographer based in Milford CT and whose work has appeared in numerous magazines and on web sites He also specialises in flash and off camera flash photography teaching OCF to anyone who will listen across the United States His love of photography and helping others forward their photographic vision has led to a successful career in this expanding field
