Apice 16 Anaesthesia Pain Intensive Care And Emergency Medicine:

Anaesthesia, Pain, Intensive Care and Emergency Medicine — A.P.I.C.E. A. Gullo, 2012-12-06 Basic research progress in technology and informatics and the success of clinical pharmacology are the fundamental bases of this interesting field of medicine Nowadays critical care medicine is no longer for experts only but it is a field in which researchers and clinicians nurses and technical staff work in an interdisciplinary way each offering their own skills The volume is divided in six sections devoted to critical care key issues to lung diseases to trauma to acid base equilibrium to perioperative medicine and to obstetrics **Anaesthesia, Pain, Intensive Care and Emergency Medicine — A.P.I.C.E.**

Antonino Gullo, 2012-12-06 The management of the critically ill patients has been in the past few years a discipline at the forefront of development which continues to make progress with the support of basic and clinical research This work is a collection of material that deals with the management of critically ill patients published on the occasion of the 13th APICE congress in November 1998 which celebrated 40 years of Critical Care Medicine Anaesthesia, Pain, Intensive Care and Emergency Medicine - A.P.I.C.E. Antonio Gullo, 2012-12-06 The management of critically ill patients has in the past few years been a discipline at the forefront of development which continues to make progress with the support of basic and clinical research in the broadest sense The application of biotechnology in this particular area has revealed itself to be essential in an attempt to provide the best interpretation of the bio humoral and functional alterations present in a long series of often complex clinical conditions The care of the critically ill is also at the forefront in the application of increasingly sophisticated clinical monitoring systems that also contribute to standardizing certain procedures establish guidelines and evaluate the efficacy of therapeutic interventions and their costs **Perioperative Critical Care Cardiology** J.L. Atlee, A. Gullo, G.

Sinagra, J.L. Vincent, 2007-03-14 This book details topics of particular importance to critical care cardiovascular diagnosis and management in the perioperative period It represents an important update for anaesthesiologists cardiologists cardiac surgeons emergency care physicians and intensivists caring for patients with acute life threatening cardiovascular afflictions

Anaesthesia, Pain, Intensive Care and Emergency Medicine — A.P.I.C.E. Antonio Gullo, 2013-06-29 At the APICE 96 research scientists and clinicians were provided with updated guidelines for the treatment of patients with acute and chronic critical conditions This volume contains 100 chapters in which the main pathophysiological concepts were reviewed with special emphasis on the cardiovascular respiratory metabolic and neurologic systems Special reference is made to the pharmacologic and biotechnologic strategies currently being used to support those vital functions that are affected by severe and sometimes devastating diseases The topics of infection sepsis and SIRS have been reviewed and updated in keeping with the most recent information available and particular focus has been directed to ethics *Anesthesia, Pain, Intensive Care and Emergency Medicine — A.P.I.C.E.* A. Gullo, 2013-04-17 The end of the second millenium is distinguished for the increasing interest in the field of critical care medicine not only among physicians and clinical scientists but also on the part

of the mass media This is an interdisciplinary area of medicine drawing upon the specialties of anesthesiology internal medicine and surgery and relying upon the essential contributions and support from basic research Advances in critical care medicine depend on the application of new technologies to the clinic the full integration of computers and informatics the continual training of physicians and technicians and the consideration of ethical issues in the clinical setting Within this complex panorama of complementary approaches and viewpoints it is apparent that critical care medicine is one of the best examples of evidence based medicine

Evaluating Critical Care William J. Sibbald, Julian F. Bion, 2012-12-06 Measuring the quality of a complex service like critical care that combines the highest technology with the most intimate caring is a challenge Recently consumers clinicians and payers have requested more formal assessments and comparisons of the quality and costs of medical care 2 Donabedian 1 proposed a framework for thinking about the quality of medical care that separates quality into three components structure process and outcome An instructive analogy for understanding this framework is to imagine a food critic evaluating the quality of a restaurant The critic might comment on the decoration and lighting of the restaurant how close the tables are to each other the extent of the wine list and where the chef trained These are all evaluations of the restaurant structure In addition the critic might comment on whether the service was courteous and timely measures of process Finally the critic might comment on outcomes like customer satisfaction or food poisoning Similarly to a health care critic structure is the physical and human resources used to deliver medical care Processes are the actual treatments offered to patients Finally outcomes are what happens to patients for example mortality quality of life and satisfaction with care Table 1 There is a debate about which of these measurements is the most important measure of quality
