Aggregate Analysis In Chipped Stone:

Aggregate Analysis in Chipped Stone Christopher T. Hall, Mary Lou Larson, 2004 Many methods are now available for analyzing lithic debitage yet no single method is entirely reliable as a vehicle to meaningful interpretation of past behavior Contributors to this volume seek to identify the strengths and weaknesses in the more widespread and competing analytical forms while arguing for the use of multiple lines of evidence

Designing Experimental Research in Archaeology Jeffrey R. Ferguson, 2010-05-15 Designing Experimental Research in Archaeology is a guide for the design of archaeological experiments for both students and scholars Experimental archaeology provides a unique opportunity to corroborate conclusions with multiple trials of repeatable experiments and can provide data otherwise unavailable to archaeologists without damaging sites remains or artifacts Each chapter addresses a particular classification of material culture ceramics stone tools perishable materials composite hunting technology butchering practices and bone tools and experimental zooarchaeology detailing issues that must be considered in the development of experimental archaeology projects and discussing potential pitfalls The experiments follow coherent and consistent research designs and procedures and are placed in a theoretical context and contributors outline methods that will serve as a guide in future experiments This degree of standardization is uncommon in traditional archaeological research but is essential to experimental archaeology The field has long been in need of a guide that focuses on methodology and design This book fills that need not only for undergraduate and graduate students but for any archaeologist looking to begin an experimental research project

Archaeological Data Recovery in the Piceance and Wyoming Basins of Northwestern Colorado and Southwestern Wyoming Matthew J. Landt, 2018-02-28 In 2008 a 14 in natural gas liquids pipeline was constructed in Colorado and Wyoming Alpine Archaeological Consultants Inc was hired to survey the route the major research themes presented here synthesize chronometric and spatial information subsistence prehistoric technology small cultural features and prehistoric architecture

Lithics William Andrefsky, Jr, 2005-12-08 This book is a fully updated and revised edition of William Andrefsky Jr's ground breaking manual on lithic analysis Designed for students and professional archaeologists this highly illustrated book explains the fundamental principles of the measurement recording and analysis of stone tools and stone tool production debris Introducing the reader to lithic raw materials classification terminology and key concepts it comprehensively explores methods and techniques presenting detailed case studies of lithic analysis from around the world It examines new emerging techniques such as the advances being made in lithic debitage analysis and lithic tool analysis and includes a new section on stone tool functional studies An extensive and expanded glossary makes this book an invaluable reference for archaeologists at all levels

Contemporary Lithic Analysis in the Southeast Philip J. Carr, Andrew P. Bradbury, Sarah E. Price, 2012-07-13 Representing work by a mixture of veterans and a new generation of lithic analysts Contemporary Lithic Analysis in the Southeast explores fresh ideas while reworking and pushing the limits of traditional methods and hypotheses The variability

in the southeastern lithic landscape over space and through time makes it a dynamic and challenging region for archaeologists. Demonstrating a holistic approach and using a variety of methods, this volume aims to derive information regarding prehistoric lifeways from lithic assemblages. The contributors use data from a wide temporal span and a variety of sites across the Southeast ranging from Texas to South Carolina and from Florida to Kentucky. Not merely cautionary tales, these case studies demonstrate the necessity of looking beyond the bag of lithic material sitting in the laboratory to address the key questions in the organization of prehistoric lithic technologies. How do field collection strategies bias our interpretations? What is the relationship between technological strategies and tool design? How can inferences regarding social and economic strategies be made from lithic assemblages?

From the Yenisei to the Yukon Ted Goebel, Ian Buvit, 2011-08-25. Who were the first people who came to the land bridge joining northeastern Asia to Alaska and the northwest of North America? Where did they come from? How did they organize technology, especially in the context of settlement behavior? During the Pleistocene era, the people now known as Beringians dispersed across the varied landscapes of late glacial northeast Asia and northwest North America. The twenty chapters gathered in this volume explore, in addition to the questions posed above, how Beringians adapted in response to climate and environmental changes. They share a focus on the significance of the modern human inhabitants of the region. By examining and analyzing lithic artifacts, geoarchaeological evidence, zooarchaeological data, and archaeological features, these studies offer important interpretations of the variability to be found in the early material culture of the first Beringians. The scholars contributing to this work consider the region from Lake Baikal in the west to southern British Columbia in the east. Through a technological organization approach, this volume permits investigation of the evolutionary process of adaptation as well as the historical processes of migration and cultural transmission. The result is a closer understanding of how humans adapted to the diverse and unique conditions of the late Pleistocene.

PaleoAmerican Archaeology in Virginia Wm. Jack Hranicky, 2017-10-10. This book is a full color study of over 500 pre-Clovis stone artifacts of Virginia. With the 22K year date of the Cinmar biface in Virginia, there is ample evidence of artifact classes that are older than Clovis. Over 50 tool types are illustrated and discussed. Artifact single site collections are documented. The book argues the differences between Holocene biface technology with the blade and core technology of the Pleistocene era. The requirements for identifying Pleistocene artifacts is presented, such as platforms, remaining cortex, and invasive retouch. They are presented in a tool model. Major stones, namely jasper, are discussed as a lithic determinism. The east coast distribution is presented for various tool types. Additionally, as a major focus, cross-Atlantic flake blade identical tools from Europe are illustrated with Middle Atlantic artifacts. Artifact ergonomics, such as right-left handed tools, hypothetical tool center, are

argued Structural and functional axis are shown and described on how to identify them on tools Overall this book presents an initiating view of the archaeology needed to study Pleistocene era artifacts on the American east coast **Prehistoric**
