How to prevent HIV

There are many ways to prevent HIV. The most effective way is to use a condom every time you have sex with someone who is HIV positive. Other ways to prevent HIV include getting vaccinated for HIV, using HIV test kits, and consulting HIV tests to know and avoid HIV exposure. It is important to remember that HIV is a virus that can be passed from one person to another through blood, semen, or vaginal fluids. It is not passed through casual contact, such as hugging or shaking hands. If you are HIV positive, it is important to tell your partner and use a condom every time you have sex with them. If you are HIV negative, it is important to get tested for HIV regularly. If you are HIV positive, you should take HIV medicine every day to keep your health and prevent HIV from spreading to others.
