Air Warfare In Mibile1495:

The Air Campaign John A. Warden, 1990 **The Air Campaign** John A. Warden III, Ventrust.inc Ventrust.inc, John A. Warden, III, Ventrust.Inc Ventrust.Inc, 2000-06-07 The Air Force staff quickly came up with an air campaign the brainchild of Colonel John Warden a brilliant brash fighter pilot and a leading Air Force intellectual on the use of airpower Warden's original plan would undergo numerous modifications but his original concept remained the heart of the Desert Storm air war Colin Powell Colin Powell My American Journey Since its original publication The Air Campaign Planning for Combat has been translated into more than a half dozen languages and is in use at military colleges throughout the world This book would later serve as the basis for the planning of much of the Gulf War air campaign Generals Schwarzkopf and Powell credited Col Warden with creating the air campaign that defeated Iraq in the Gulf War This new edition includes a new epilogue where Col Warden has refined and extended many of the ideas presented in the original book The most significant of these refinements is the development of the theory of the enemy as a system which flows from the center of gravity concepts developed in the first edition The Art of Aerial Warfare Colonel Usaf David A. Moore, USAF, David A., David Moore, , USAF, 2012-09-21 The author presents a stimulating paper about conducting aerial warfare defined as the use of the destructive instrument of airpower applied against an enemy in time of war He challenges Airmen to acquire mental agility commensurate with the unprecedented flexibility of their instruments The author fills a critical gap in aerial warfare literature Most works focus on the technical or tactical aspects of the profession and medium but stop short of discussions of the broader nature of war itself Consideration of war in that larger sense is essential for those who seek to understand and especially apply air and space power in combat The author begins with the Clausewitzian assumption easily accepted in theory but difficult to maintain during combat that war has the purpose of achieving political goals and that almost any reason for fighting a war has or soon acquires a political dimension As he points out the most difficult cases arise when the political objectives are difficult to reconcile with the reality of warfare violence and casualties His discussion of the many obstacles to achieving military and political aims raises many issues facing Airmen today and does not hesitate to take unequivocal positions His clear and compelling examination of the changing context of warfare makes a strong case that the enemy's fielded forces are still the best targets of airpower His consideration of the tension between the seductiveness of the incremental approach and legitimate need for political authorities to modulate the use of airpower is stimulating and forceful His discussion of Douhet and the enduring fascination with strategic attack merits the consideration of those who plan modern aerial campaign Red Flag Tyson V. Rininger, 2006 Red Flag takes the reader behind the scenes of the biggest most complex high tech military exercise conducted anywhere in the world The Red Flag exercises which take place at Nellis Air Force Base just outside of Las Vegas bring together the U S Air Force and aircraft and crews from its allies around the world for two weeks of training that is as intense and demanding as actual combat Red Flag Air Combat for the 21st Century

offers a complete history and an unprecedented insider's view of the fully integrated war conditions exercise that uses the largest combat range on the planet the size of Connecticut and involves every kind of military aircraft and asset from fighters tankers and bombers to helicopters satellites and unmanned aircraft With dynamic photos and firsthand description the book also gives readers a close up look at the modern and upgraded version of Red Flag Joint Red Flag an all new exercise integrating live and virtual elements in a seamless campaign that challenges warfighters and tests command and control procedures processes and architecture

Joint Training for Night Air Warfare Lt Col Usaf Brian W McLean, USAF, Brian W., Brian McLean, Lt. , USAF, 2012-08-07 The genesis of this book can be traced to two specific assignments the author's Air Force Navy officer exchange duty in F 14s and his tour on the staff in the Special Management Organization for low altitude navigation and targeting infrared for night LANTIRN From his experiences with the Navy he gained an appreciation for how well the services can work together if we can overcome the challenges to joint operations The author's experiences since then with Marine and Army personnel convinced him that the same discipline pride and expertise run through any warrior regardless of what color uniform he or she wears or what service insignia is painted on the side of the airplane This ingrained devotion to duty properly directed toward mission accomplishment can override any sense of interservice rivalry and greatly increase the sum total of military power through joint operations This inherent capability is limited though because of a lack of an in depth aware of each other's capabilities and limitations Following this exposure to the possibilities of joint operation the author's tour in the LANTIRN office at Headquarters TAC convinced him that future air warfare must include night combat He felt that the tactical capability provided by the emerging night technology was too great to be neglected Each of the armed services had or was developing the technology for night warfare but there was no formal program to develop or train for joint night tactics or operations When offered the opportunity to compete for the PACAF command sponsored research fellowship at AUCADRE he saw this as an opportunity to point out what he considered an oversight and propose a solution to the issue Although this book was started well before the events of Operations Desert Shield Desert Storm the author was gratified to see his initial assumptions validated Joint operations including joint night operations are a critically important part of modern war The success of Operation Desert Storm was the result of joint development and training efforts during the months of Desert Shield Continuous efforts must be made to ensure a future capability This report has a proposed training method for
