

Apollo 13 Life In Space

JS Bruner

Apollo 13 Life In Space:

Apollo 13 Sydelle Kramer,1995 Looks at the Apollo space program and provides information on the problems faced by Apollo 13 **Apollo 13** Sydelle Kramer,1995-01-01 From preparation for lift off to the outer space emergency that almost claimed the Apollo 13 astronauts lives find out what it s like to live in space in this fact filled full color book with movie stills and real NASA photos plus diagrams cross sections and cut aways of everything from space suits to spaceships **Apollo**

13 Laura B. Edge,2020-03-03 Houston we ve had a problem On April 13 1970 the three astronauts aboard the Apollo 13 spacecraft were headed to the moon when a sudden explosion rocked the ship Oxygen levels began depleting rapidly Electrical power began to fail Astronauts James Lovell Jack Swigert and Fred Haise were about to be stranded in the inky void of outer space The mission to the moon was scrapped Now Apollo 13 s only goal was to bring the crew home With the damaged spacecraft hurtling towards the moon at roughly six thousand miles per hour there was little hope of success But the astronauts and mission control were fully prepared to do whatever it took to return the crew to Earth This space disaster occurred at the peak of the United States Space Race against the Soviet Union But for four days in 1970 the two nations put aside their differences and the entire world watched the skies hoping and praying the astronauts would return safely As missions to Mars and commercial space flight become a reality the time is now to be reminded of our common humanity of how rivals can work together and support each other towards a shared goal Because no matter what happens or where we travel we all call Earth home **Life in the Universe** Joseph A. Angelo,2007 Details the history of the hunt for life on other planets the technology that is used and the scientific concepts on which the search criteria has been designed **Science,**

Society, and the Search for Life in the Universe Bruce M. Jakosky,2022-10-18 Are we alone in the universe As humans are we unique or are we part of a greater cosmic existence What is life s future on Earth and beyond How does life begin and develop These are age old questions that have inspired wonder and controversy ever since the first people looked up into the sky With today s technology however we are closer than ever to finding the answers Astrobiology is the relatively new but fast growing scientific discipline that involves trying to understand the origin evolution and distribution of life within the universe It is also one of the few scientific disciplines that attracts the public s intense curiosity and attention This interest stems largely from the deep personal meaning that the possible existence of extraterrestrial life has for so many Whether this meaning relates to addressing the Big Questions of our existence the possibility of encountering life on other planets or the potential impact on our understanding of religion there is no doubt that the public is firmly vested in finding answers In this broadly accessible introduction to the field Bruce Jakosky looks at the search for life in the universe not only from a scientific perspective but also from a distinctly social one In lucid and engaging prose he addresses topics including the contradiction between the public s fascination and the meager dialogue that exists between those within the scientific community and those outside of it and what has become some of the most impassioned political wrangling ever seen in government science

funding **The Apollo 13 Mission** Cassandra Radomski,2014 Explains the Apollo 13 crisis including its chronology causes and lasting effects **The Dark Side of NASA** Paul Torrance,2022-11-03 For the first time the author Paul Torrance

reveals the dark side of NASA As a retired NASA engineer his work experience in the trenches gives the reader a unique insight into the management system in place during the latter Apollo and Space Shuttle era and what led to disaster

Spaceship Earth in the Environmental Age, 1960-1990 Sabine Höhler,2015-10-06 The idea of the earth as a vessel in space came of age in an era shaped by space travel and the Cold War Höhler's study brings together technology science and ecology to explore the way this latter day ark was invoked by politicians environmentalists cultural historians writers of science fiction and many others across three decades *A Day in a Working Life* Gary Westfahl,2015-04-21 Ideal for high

school and college students studying history through the everyday lives of men and women this book offers intriguing information about the jobs that people have held from ancient times to the 21st century This unique book provides detailed studies of more than 300 occupations as they were practiced in 21 historical time periods ranging from prehistory to the present day Each profession is examined in a compelling essay that is specifically written to inform readers about career choices in different times and cultures and is accompanied by a bibliography of additional sources of information sidebars that relate historical issues to present day concerns as well as related historical documents Readers of this work will learn what each profession entailed or entails on a daily basis how one gained entry to the vocation training methods and typical compensation levels for the job The book provides sufficient specific detail to convey a comprehensive understanding of the experiences benefits and downsides of a given profession Selected accompanying documents further bring history to life by offering honest testimonies from people who actually worked in these occupations or interacted with those in that field

James Lovell Jan Goldberg,2003-11 A biography of James Lovell that encompasses the astronaut's birth childhood education NASA training mission experience and post space life and work
