Langton,2025-10-09 Darwin in the Jewish Imagination provides an overview of Jewish responses to Darwinian evolution one of the most transformative and challenging ideas of the industrial age Spanning a century of intellectual and cultural history it examines how Jewish thinkers traditionalists reformers secularists mystics and philosophers grappled with the profound implications of evolutionary theory for their religious beliefs and cultural identities The book offers close readings of key figures and debates from Europe to the United States situating them within the broader contexts of the

religion science controversy Jewish Christian interfaith relations and the intellectual challenges of modernity A central theme is the pan theistic tendency evident in Jewish thought reflecting a vision of God as intimately connected with the evolving universe and its natural laws It explores how Jewish thinkers reinterpreted foundational concepts such as creation divine action and human morality in light of Darwin's ideas This interdisciplinary work not only illuminates how Jewish thought adapted to evolutionary theory but also reveals the broader cultural and theological exchanges shaping modern Judaism By examining these responses the book sheds light on how science and Jewish religion have engaged in an enriching dialogue with profound consequences for modern Jewish thought belief and identity Hebrew Union College Annual Volume 88
