Technology-Based Pilot Programs National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on Reserve Forces for 2010 and Beyond, 1999-09-01 As the twenty first century approaches the number of full time active duty personnel in the U S military excluding the Reserves and National Guard is about 1.4 million the lowest level since before World War II Nevertheless the U S military is supposed to be prepared to fight two major theater wars almost simultaneously while conducting peacekeeping operations and other assignments around the globe To fulfill this wide range of missions the U S military must continue to rely on the Reserves and National Guard which are known collectively as the reserve components The current number of reserve components is almost equal to the number of active duty personnel In the case of the U S Army the number of reserves is double the number of active personnel This study addresses how technology can be used to improve the readiness and effectiveness of the reserve components and their

integration with the active components Many technologies are expected to enhance the capabilities of the U S military in the twenty first century including precision weapons high fidelity sensors long range surveillance enhanced stealth characteristics and advanced communications and information systems This study reaffirms the importance of improved communication and information systems for improving comprehensive training and accelerating the mobilization of reserve components for military missions in the coming decade Although programs using these technologies are already under way in both the reserve and active components of the military this study focuses on the effectiveness of reserve components and active reserve integration

The Virtual World of Work K. J. McLennan, 2008-01-01 The purpose of this book project is to analyze why the workplace is changing so rapidly identify the enabling factors and understand what we can do to best prepare for the future The analysis led to four significant factors which are all fundamental to the formation of the future world of work They are the incredible enabling technologies changing attitudes workforce demographics and globalization The rapid and irreversible coalescing of these factors is creating what is referred to in the book as The Virtual World of Work or VWOW The book covers the changing workplace from the 1960s through to the present and then looks to see what is emerging next and provides predictions for the future workplace To assist the readers in tracking their progress the book provides a segmentation of this time frame into four distinct stages Each stage is identified by the capabilities specific to the majority of the worker force in each stage As the work force transitions from one stage to the next the accumulated enhancements or changes to who how where and when tasks are completed is explored The book project introduces some original thinking and combines this with the knowledge and expertise from the leaders in this new field The book is organized around five basic questions concerning the virtual world of work The questions are What is the Virtual World of Work What Factors have Enabled the Virtual World of Work Will the Virtual World of Work Continue How will the Virtual World Work How to Architect the Virtual World of Work The book covers why the change is happening and how we can better plan for the future virtual world of work Over 25 million workers in the U S work from home at least a few days per month More and more workers are joining these virtual workers daily and the amount of time worked out of the traditional office is growing even more rapidly There are literally millions of people who need the information in this book
