Resources in Education ,1995 Psychology, Seventh Edition, in Modules David G. Myers,2004-06 *Psychology, Seventh Edition, in Modules (spiral)* David G. Myers,2003-09-22 This breakthrough iteration of David Myers best selling text breaks down the introductory psychology course into 55 brief modules **Exercises in Modules and Rings** T.Y.

Lam,2009-12-08 The idea of writing this book came roughly at the time of publication of my graduate text *Lectures on Modules and Rings* Springer GTM Vol 189 1999 Since that time teaching obligations and intermittent intervention of other projects caused prolonged delays in the work on this volume Only a lucky break in my schedule in 2006 enabled me to put the finishing touches on the completion of this long overdue book This book is intended to serve a dual purpose First it is designed as a problem book for *Lectures* As such it contains the statements and full solutions of the many exercises that appeared in *Lectures* Second this book is also offered as a reference and repository for general information in the theory of modules and rings that may be hard to find in the standard textbooks in the field As a companion volume to *Lectures* this work covers the same mathematical material as its parent work namely the part of ring theory that makes substantial use of the notion of modules The two books thus share the same table of contents with the first half treating projective injective and flat modules homological and uniform dimensions and the second half dealing with noncommutative localizations and Goldie's theorems maximal rings of quotients Frobenius and quasi Frobenius rings concluding with Morita's theory of category equivalences and dualities **Featured Reviews in "Mathematical Reviews" 1995-1996** Donald G. Babbitt,Jane E.

Kister, This collection of reprinted Featured Reviews published in *Mathematical Reviews* MR in 1995 and 1996 makes widely available informed reviews of some of the best mathematics published recently Featured Reviews were introduced in MR at the beginning of 1995 in part to provide some guidance to the current research level literature With the exponential growth of publications in mathematical research in the first half century of MR it had become essentially impossible for users of MR to identify the most important new research level books and papers especially in fields outside of the users own expertise This work identifies some of the best new publications papers and books that are expected to have a significant impact on the area of pure or applied mathematics with which researchers are concerned All of the papers reviewed here contain interesting new ideas or applications a deep synthesis of existing ideas or any combination of these The volume is intended to lead the user to important new research across all fields covered by MR Handbook of Research on Teacher and Student

Perspectives on the Digital Turn in Education Karpava, Sviatlana, 2022-06-24 In recent years the traditional way of teaching has been substituted by online teaching Teachers have had to think about efficient and effective teaching methods and activities in online delivery that can keep students interested and engaged It is important to examine teacher cognition and its relevance to classroom management and teaching practice as the role of technology in teaching and learning cannot be overestimated The Handbook of Research on Teacher and Student Perspectives on the Digital Turn in Education examines the cognitions of teachers and students their attitudes and perceptions regarding online teaching and their personal experiences and challenges regarding the use of online platforms and digital tools This book discusses the implementation of digital technologies in primary secondary and tertiary education that facilitates the learning and teaching process and creates a student centered environment Covering topics such as digital literacy student engagement and pedagogy this reference work is an essential resource for practitioners scholars administrators policymakers researchers academicians instructors and students
