Alienation And Identification:

Alienation and Identification Austin J. McGrath, 2021 Consider your love for something you believe valuable perhaps a friend or your child Contrast this love with the kind of hate that drug addicts typically have toward their addiction Some philosophers would call your desire for your friend s or child s wellbeing an identified with attitude and the addict s desire for their drug an alien attitude Many use identification and alienation as standards for among other things moral responsibility and autonomy arguing that identifying with an attitude that leads one to act is sufficient or necessary for moral responsibility for and autonomy in that act whereas being alienated from the attitude that leads to action is sufficient or necessary for not being morally responsible for nor autonomous in the act Even non philosophers seem to use alienation and identification often we use them as standards for living our best lives our best lives fit with what we really believe and want that is attitudes we identify with The problem is extant and natural theories of alienation and identification are almost universally recognized as deeply problematic I argue for new theories of both alienation and identification that I also argue solve these problems The first chapter starts with the idea that the concepts of alienation and identification mutually exclude each other If an attitude is alien we cannot think it is identified with and if an attitude is identified with we cannot think it is alien I ask the question which relation between alienation and identification most plausibly secures their mutual exclusivity Beside the answer being interesting it will ensure that our theories of alienation and identification do not allow for the impossible alien identified with attitude and it may help us develop a theory of one from the other for example if alienation were merely not identifying with an attitude then once we have a theory of identification we immediately have one of alienation The relation that I argue most plausibly secures their mutual exclusivity is a certain kind of opposition which allows for neutral attitudes attitudes that we neither identify with nor are alienated from The next chapter begins by explaining certain deep apparently intractable problems for extant and natural theories of alienation Very roughly the main problems are that none of the views can handle cases in which we manipulate you into alienation they all imply that alienation can be the result of manipulation nor can they provide a principled reason why the attitudes they point to as those constituting our alienation are of the right kind are special enough to ground our alienation for example a rejection of another attitude doesn t seem to have any particularly special features allowing it to constitute our alienation with another attitude The view I argue for that I also argue solves these problems is roughly an attitude is alien just when and because the relevant negative attitude toward it makes sense in light of all of our attitudes collectively The rough argument for this view is that an attitude is alien just when and because our rejection of it reflects our view and this happens just when and because the rejection makes sense to us The thesis of the next chapter naturally follows if the first two are right an attitude is identified with just and because the relevant pro attitude toward it makes sense in light of our attitudes collectively For example when your say endorsement of your desire for your friend or child s wellbeing makes sense in light of your other attitudes collectively when your full actual self

rationalizes the endorsement then and only then is your desire identified with Not surprisingly I argue for this view in roughly the same way I argue for the alienation view of the previous paper *Alienation and Identification* Morton A. Kaplan,1976 **Alienation Vs. Identification** Souran Mardini,2015 *Medical Bulletin of the European Command* ,1972

The Social Economics of Poverty Christopher B. Barrett,2006-10-03 A unique analysis of the moral and social dimensions of microeconomic behaviour in developing countries this book calls into question standard notions of rationality and many of the assumptions of neo classical economics and shows how these are inappropriate in communities with widespread disparity in incomes This book will prove to be essential for students studying development economics

Handbook of Income Distribution Anthony B. Atkinson,Francois Bourguignon,2014-12-30 What new theories evidence explanations and policies have shaped our studies of income distribution in the 21st century Editors Tony Atkinson and Francois Bourguignon assemble the expertise of leading authorities in this survey of substantive issues In two volumes they address subjects that were not covered in Volume 1 2000 such as education health and experimental economics and subjects that were covered but where there have been substantial new developments such as the historical study of income inequality and globalization Some chapters discuss future growth areas such as inheritance the links between inequality and macro economics and finance and the distributional implications of climate change They also update empirical advances and major changes in the policy environment The volumes define and organize key areas of income distribution studies Contributors focus on identifying newly developing questions and opportunities for future research The authoritative articles emphasize the ways that income mobility and inequality studies have recently gained greater political significance *The Philosophy of MetaReality* Roy Bhaskar,2013-03-01 First Published in 2012 The Philosophy of MetaReality creativity love and freedom is the third of three books elaborating Roy Bhaskar s philosophy of metaReality which appeared in rapid succession in 2002 A big rich book teaming with ideas The Philosophy of MetaReality is undoubtedly the magnum opus of Bhaskar s spiritual turn Building on a radical new analysis of the self human agency and society Roy Bhaskar shows how the world of alienation and crisis we currently inhabit is sustained by the ground state qualities of intelligence creativity love a capacity for right action and a potential for human self realisation or fulfilment A new introduction to this edition by Mervyn Hartwig founding editor of Journal of Critical Realism and editor of A Dictionary of Critical Realism Routledge 2007 describes the context significance and impact of the philosophy of metaReality and supplies an expert guide to its content This book is essential reading for students and practitioners of both philosophy and the human sciences **Cultural Identity in Transition** Jari

Kupiainen,Erkki Sevänen,John Stotesbury,2004 Cultural Identity In Transition Analyses The Challenges That Globalisation And Modernisation Have Brought To Cultural Identity In Recent Years This Collection Of Articles Highlights Some Of The Central Theoretical Ideas And Models Currently Used In The Analysis Of Cultural Identity In The Social And Cultural Sciences While The Book S Main Regional Focus Is On Northern Europe This Is Complemented By Several Case Studies

Addressing Issues Of Cultural Identity In Indigenous And Ethnic Communities In Literary And Artistic Expression And In Terms Of National Politics Around The World The Book Discusses In Detail The Questions Like What Is At Stake In The Global Culture Industry In Terms Of Cultural Identity How Do The Internet And Information Technology In General Empower Local Communities What Kinds Of Political Struggles And Conflicts Can Be Associated With The Processes Of Cultural Identity Cultural Identities Are In Transition But In What Direction Are They Moving Cultural Identity In Transition Will Be Essential Reading For University Students And Researchers In Sociology Anthropology And Cultural And Literary Studies

Conceptualising and Measuring Work Identity Paul G.W. Jansen, Gert Roodt, 2014-10-08 This book provides a systematic overview on issues and challenges related to work identity and identification at work in the new South African workplace It shares results and measures of a work identity research project that was conducted in a variety of modern South African workplaces It looks at the concept of work identity in the light of a keen and growing interest in why people are becoming attached to involved in engaged with or committed to their work Still a relatively unexplored concept built on the foundations of different identity theory streams the concept of work identity provides a fundamental reconsideration of explaining engaging behaviours at work Against the backdrop of a changing political and economic landscape and the impact these radical changes had on the South African workplace the main research question of the project was the South African employees question Who am I at work In search of the answer to that question the book explores the impact of South African employees life spheres and life roles on their choice of work related identification foci It further explores how identity work tactics and strategies are being used to develop and define their own work identities resulting in the conceptualisation and development of a work based identity measure

Social Identity in Question Parisa Dashtipour, 2012-07-26 Social identity theory is one of the most influential approaches to identity group processes intergroup relations and social change This book draws on Lacanian psychoanalysis and Lacanian social theorists to investigate and rework the predominant concepts in the social identity framework Social Identity in Question begins by reviewing the ways in which the social identity tradition has previously been critiqued by social psychologists who view human relations as conditioned by historical context culture and language The author offers an alternative perspective based upon psychoanalytic notions of subjectivity The chapters go on to develop these discussions and they cover topics such as self categorisation theory group attachment and conformity the minimal group paradigm intergroup conflict social change and resistance Each chapter seeks to disrupt the image of the subject as rational and unitary and to question whether human relations are predictable It is a book which will be of great interest to lecturers researchers and students in critical psychology social psychology social sciences and cultural studies
