Flows on Compact Surfaces Nelson G. Markley, Mary Vanderschoot, 2023-07-18 This textbook offers a uniquely accessible introduction to flows on compact surfaces filling a gap in the existing literature The book can be used for a single semester course and or for independent study It demonstrates that covering spaces provide a suitable and modern setting for studying the structure of flows on compact surfaces The thoughtful treatment of flows on surfaces uses topology especially covering spaces the classification of compact surfaces and Euclidean and hyperbolic rigid motions to establish structural theorems that describe flows on surfaces generally Several of the topics from dynamical systems that appear in this book e g fixed points invariant sets orbits almost periodic points also appear in the many subareas of dynamical systems The book successfully presents the reader with a self contained introduction to dynamical systems or an expansion of one s existing knowledge of the field Prerequisites include completion of a graduate level topology course a background in dynamical systems is not assumed
