All We Did Was Fly To The Moon:

"All We Did was Fly to the Moon" Dick Lattimer,1995

Apollo 12 - On the Ocean of Storms David M.

Harland,2011-02-26 In July 1969 the amiable strangers that made up the crew of the historic Apollo 11 flight successfully achieved the first manned lunar landing Several months later three close friends set off on an even more challenging mission Free of the burden of making history the Apollo 12 astronauts were determined to really enjoy their experience while taking care of business This is the story of their mission told largely in their own words Their exploits and accomplishments showed how conservative the inaugural mission had been With its two moonwalks deployment of the first geophysical station on the Moon and geological sampling Apollo 12 did what many had hoped would be achieved by the first men to land on the Moon The Apollo 12 mission also spectacularly demonstrated the precision landing capability required for success in future lunar surface explorations In addition to official documents published prior to and after the mission APOLLO 12 ON THE OCEAN OF STORMS draws on the flight transcript and post mission debriefing to recreate the drama **A Dictionary of the**

Space Age Paul Dickson,2009-04-14 The launch of Sputnik 1 in 1957 ushered in an exciting era of scientific and technological advancement As television news anchors radio hosts and journalists reported the happenings of the American and the Soviet space programs to millions of captivated citizens words that belonged to the worlds of science aviation and science fiction suddenly became part of the colloquial language What s more NASA used a litany of acronyms in much of its official correspondence in an effort to transmit as much information in as little time as possible To translate this peculiar vocabulary Paul Dickson has compiled the curious lingo and mystifying acronyms of NASA in an accessible dictionary of the names words and phrases of the Space Age This dictionary captures a broader foundation for the language of the Space Age based on the historical principles employed by the Oxford English Dictionary and Webster s Third New International Dictionary Word histories for major terms are detailed in a conversational tone and technical terms are deciphered for the interested student and lay reader This is a must own reference for space history buffs Book Jacket *Dark Mission* Richard C. Hoagland, Mike Bara, Michael Bara,2009 For most people the word NASA suggests a squeaky clean image of technological infallibility Yet the truth is that NASA was born as a lie and has concealed the truth about its occult origins ever since Mystical organisations dominate NASA and carry out their own agendas behind the scenes Why was the Bush administration hell bent on returning to the moon Why is there a new space race with Russia China and even India Hoagland and Bara answer these questions and many more **The Secret Influence of the Moon** Louis Proud,2013-12-01 The Moon is not a cold dead rock but a rich fascinating world just as alive as Earth Investigates the Moon as the home of an alien intelligence who controls humanity Examines several of NASA s Apollo missions and the findings they concealed Reveals the many holes in the Giant Impact theory about the Moon s origins and the evidence for a hollow artificial Moon Explores the deep influence of the Moon on the collective mind of humanity and occult teachings about the Moon from the Qabbalah tarot and other

sources Despite being the most prominent celestial body after the Sun the Moon has many qualities that science has yet to explain Lunar rock samples reveal the Moon once had a magnetic field like the Earth and seismic experiments by NASA suggest the Moon is at least partially hollow For centuries people have observed lights moving clouds and shadows and even the disappearance of entire craters via telescope Apollo astronauts repeatedly felt the presence of a non human intelligence during their Moon visits and many indigenous traditions speak of malevolent visitors from the Moon A growing body of astrophysical and geological evidence shows the Moon is not an entirely natural world that someone or something altered it long ago Louis Proud explores the phases and movements of the Moon along with its ancient and mysterious features its craters maria rilles tunnels and domes He examines several of NASA's Apollo missions showing not that NASA faked the Moon expeditions but that they concealed what the astronauts found there He explains the many holes in the commonly accepted Giant Impact theory of the Moon's origins and reveals the evidence for a hollow artificial Moon placed in orbit eons ago to observe Earth Examining the deep influence of the Moon on the collective mind of humanity Proud looks at what the Qabalah the tarot and other occult traditions say about the Moon and interprets G I Gurdjieff's teachings that we are food for the Moon He investigates the Moon as a gateway to another realm as the Purgatory of Christianity and as the home of an alien intelligence who controls and exploits humanity Examining the Moon from both scientific and esoteric perspectives Proud shows the Moon is not a cold dead rock but a rich fascinating world just as alive as Earth

A Tribble's Guide to Space Alan C. Tribble, 2002 Space the final frontier It's as little as fifty miles away and yet it is considered one of the most dangerous and remote of places Popular television shows such as Star Trek and movies such as Apollo 13 and October Sky have fired the imaginations of would be explorers Alan Tribble has worked on the design and development of dozens of spacecraft including the Space Shuttle and the International Space Station A Tribble's Guide to Space is a how to book that is firmly grounded in the realities of current state of the art space engineering while tapping into the power of imagination that drives us to explore Alan Tribble offers a delightful guide to the nuts and bolts of space exploration from how to get there to how to phone home and how to survive the harsh environment of space Using examples from famous space missions both factual and fictional Tribble tackles fascinating real world problems encountered in space exploration Why do submarine hatches open inward and spacecraft hatches open outward What do curveballs and satellites have in common Why did Scotty the chief engineer of the fictional USS Enterprise always need more power Why did the fire that destroyed Apollo I on the launch pad burn so furiously that no one could react fast enough to save the lives of the crew In answering these questions Tribble examines getting to space from the physics of motion to the practical implications of

How to Find the Apollo Landing Sites James L. Chen, 2014-06-04. This book is for anyone who wants to be able to connect the history of lunar exploration to the Moon visible above. It addresses what Apollo equipment and experiments were left behind and what the Apollo landing sites look like now. Each Apollo mission is examined in detail with photos that progressively zoom in to guide the reader in locating the Apollo landing sites. Guided by official NASA photographs from the Lunar Reconnaissance Orbiter and the original Apollo missions, the reader can view the Moon with a new appreciation of the accomplishment of landing astronauts on its surface. Countless people have gazed at the Moon in the night sky, knowing the successes of the Apollo Program in landing men on the Moon. After the information in this guide, casual and serious observers can actually point out where the Apollo landings occurred as well as knowing why those sites were chosen.

Gemini 4 David J. Shayler, 2018-12-18. The flight of Gemini 4 in June 1965 was conducted barely four years after the first Americans flew in space. It was a bold step

by NASA to accomplish the first American spacewalk and to extend the U S flight duration record to four days This would be double the experience gained from the six Mercury missions combined This daring mission was the first to be directed from the new Mission Control at the Manned Spacecraft Center near Houston Texas It also revealed that Working outside the spacecraft would require further study Developing the techniques to rendezvous with another object in space would not be as straightforward as NASA had hoped Living in a small spacecraft for several days was a challenging but necessary step in the quest for even longer flights Despite the risks the gamble that astronauts Jim McDivitt and Ed White undertook paid off Gemini 4 gave NASA the confidence to attempt an even longer flight the next time That next mission would simulate the planned eight day duration of an Apollo lunar voyage Its story is recounted in the next title in this series Gemini 5 Eight Days in Space or Bust
