Carbon Footprint Top:

Environmental Footprints Kai Fang, 2020-10-19 This book focuses on environmental footprints that have attracted considerable interest and discussion within academia policy makers and the public as a tool to assess anthropogenic effects on the environment It begins with an overview which provides a starting point for understanding the concept of environmental footprints On the basis of a thorough investigation into the theoretical and methodological aspects of selected environmental footprints that have been widely adopted a unified framework for structuring categorizing and integrating various footprint indicators is established Furthermore the book brings clarity to the relationship between footprint analysis and life cycle assessment and challenges the isolation of environmental footprints and planetary boundaries The findings provide novel insights into the development of environmental footprints for environmental impact assessment and environmental sustainability assessment *Vocabulary for Sustainable Consumption and Lifestyles* Lewis Akenji, Philip J. Vergragt, Halina Szejnwald Brown, Thomas S.J. Smith, Laura Maria Wallnöfer, 2025-09-29 *Vocabulary for Sustainable Consumption and Lifestyles* a Language for our Common Future curates a shared vocabulary of concepts that enables a society wide conversation about sustainable consumption and lifestyles the future of consumer society and ways to transcend it Since the United Nations UN Earth Summit in Rio de Janeiro in 1992 the global environmental and social consequences of mass consumption have been well documented yet progress is slow Overconsumption and extractive practices continue to drive ecological overshoot Set against this backdrop each of the 87 essays in this book imparts a meaning to a concept highlights its history and offers different perspectives interpretations and applications for social change The two premises of this book are that we need to transition to a society in which the well being and dignity of people are achieved with a much smaller footprint and that technological solutions are inadequate for the challenge Policies and actions are greatly lagging behind the growing understanding of the system of production consumption because social change is often slow and sustainable consumption does not have a clear political champion The book addresses tensions that also interfere with progress such as science versus politics economic winners versus losers traditions versus an uncertain future and present needs versus future costs This innovative volume is an important resource for students scholars policymakers grassroots activists and agents of change interested in sustainable consumption and sustainable living more broadly **Sustainable Energy Systems With Policies in China** Pu-yan Nie, You-hua Chen, Chan Wang, Yong-cong Yang, Henry Wang, 2022-07-26 CIO Best Practices Gary Cokins, Karl D.
