Sustainable Logistics Systems Using AI-based Meta-Heuristics Approaches Jiuping Xu, Mitsuo Gen, Zongmin Li, YoungSu Yun, 2023-12-22 This book introduces and analyses recent trends and studies of sustainable logistics systems using AI based meta heuristics approaches including AI based meta heuristics applied to supply chain network models integrated multi criteria decision making approaches for green supply chain management uncertain supply chain models etc It emphasizes both theory and practice providing methodological and theoretical basis as well as case references for sustainable logistics systems using AI based meta heuristics Most of multi national enterprises today face the challenge of sustainable

development for their logistics systems trying to meet or exceed customer expectations Sustainable development attracts both researchers and industrial practitioners who are focused on the design and implementation of logistics system AI based meta heuristics approaches has emerged as a capable method for quickly providing optimal or near optimal solutions for the problems that exact optimization cannot solve Recent advances in various AI based meta heuristics approaches can resolve various and complex logistics and supply chain problem types This book mainly encompasses the most popular and frequently employed AI based meta heuristics approaches such as genetic algorithm variable neighborhood search multi objective heuristic search and the hybrid of these approaches The chapters in this book were originally published in the International Journal of Management Science and Engineering Management Smart Cities for Sustainability Mohammed El Amine Abdelli, Asma Sghaier, Atila Akbaba, Samia Chehbi Gamoura, Hamid Doost Mohammadian, 2023-12-11 As decision makers apply digitalization in global cities to achieve their SDG goals contributors from around the world here shed light on forthcoming developments in Smart Cities and set out how to plan for increasingly rapid changes *Innovating Energy Access for Remote Areas: Discovering Untapped Resources* Schäfer, Martina, Kammen, Daniel, Kebir, Noara, Philipp, Daniel, 2015-02-16 This volume centers on the idea that innovative approaches for energy access can work with previously underutilized or unrecognized resources as this may lead to circumstances for the development of successful and sustainable energy programs Such untapped resources may be seen in the discovering of synergies in areas such as pre existing service infrastructures supply chain and value chain management natural resource availability financing schemes and leap frog technologies Additionally decentralized approaches can contribute to climate change adaptation measures and increase resiliency for vulnerable communities Of course small scale solutions have clear limitations in regard to global climate and it is important to consider how far they can extend and aggregate impact This book assembles a selection of articles collected from the 2014 Energy Access Conference at UC Berkeley aiming to consider technical financial human institutional and natural resource capital Im Fokus der Konferenz Innovating Energy Access for Remote Areas Discovering Untapped Resources die vom 10 bis zum 12 April 2014 an der University of California stattfand war der Zugang zu moderner Energieversorgung in strukturschwachen Regionen Dieser Tagungsband tr gt eine Reihe von innovativen Ans tzen zusammen die auf der Konferenz diskutiert wurden In den Beitr gen spiegeln sich aktuelle Konzepte Theorien Methoden und Techniken im Bereich der dezentralen Energieversorgung Im Mittelpunkt vieler Beitr ge steht die Frage wie sich vormals ungenutzte oder unbekannte lokale Ressourcen nutzbar machen lassen Neue Potentiale ergeben sich aus Synergien zwischen supply and value innovation neuen Finanzierungsans tzen und der Nutzung sogenannte leapfrog technologies Die Beitr ge zeigen wie dezentrale Ans tze und kleinteilige lokale L sungen zur Bek mpfung des Klimawandels und die Anpassung an seine Folgen beitragen und die Resilienz gef hrter Gemeinschaften st rken k nnen Biodiesel Fuels Based on Edible and Nonedible Feedstocks, Wastes, and Algae Ozcan Konur, 2021-05-05 This second volume of the Handbook of Biodiesel and Petrodiesel

Fuels presents a representative sample of the population papers in the field of feedstock specific biodiesel fuels. The research on feedstocks for biodiesel fuels has first focused on the edible oils as first generation biodiesel fuels. However, the public concerns about the competition with foods based on these feedstocks and adverse impact on the ecological diversity and deforestation have resulted in the exploration of nonedible oil based biodiesel fuels as second generation biodiesel fuels in the first instance. Due to the ecological and cost benefits of treating wastes, waste oil based biodiesel fuels as third generation biodiesel fuels have emerged. Furthermore, following a series of influential review papers, the research has focused on the algal oil based biodiesel fuels in recent years. Since the cost of feedstocks in general constitutes 85% of the total biodiesel production costs, the research focused more on improving biomass and lipid productivity in these research fields. Furthermore, since water, CO₂, and nutrients, primarily N and P, have been major ingredients for the algal biomass and lipid production, the research has also intensified in the use of wastewaters and flue gases for algal biomass production to reduce the ecological burdens and the production costs.

Part 1 presents a representative sample of the population papers in the field of edible oil based biodiesel fuels, covering major research fronts. It covers soybean oil based biodiesel fuels, palm oil based biodiesel fuels, and rapeseed oil based biodiesel fuels as case studies, besides an overview paper. Part 2 presents a representative sample of the population papers in the field of nonedible oil based biodiesel fuels, covering major research fronts. It covers Jatropha oil based biodiesel fuels, pongamia oil based biodiesel fuels, and moringa oil based biodiesel fuels as case studies, besides an overview paper. Part 3 presents a representative sample of the population papers in the field of waste oil based biodiesel fuels, covering major research fronts. It covers wastewater sludge based biodiesel fuels, waste cooking oil based biodiesel fuels, and microbial oil based biodiesel fuels as case studies, besides an overview paper. Part 4 presents a representative sample of the population papers in the field of algal oil based biodiesel fuels, covering major research fronts. It covers algal biomass production in general, algal biomass production in wastewaters, algal lipid production, hydrothermal liquefaction of algal biomass, algal lipid extraction, and algal biodiesel production, besides an overview paper. This book will be useful to academics and professionals in the fields of Energy, Fuels, Chemical Engineering, Physical Chemistry, Biotechnology, and Applied Microbiology, Environmental Sciences, and Thermodynamics.

Ozcan Konur is both a materials scientist and social scientist by training. He has published around 200 journal papers, book chapters, and conference papers. He has focused on the bioenergy and biofuels in recent years. In 2018, he edited *Bioenergy and Biofuels*, that brought together the work of over 30 experts in their respective field. He also edited *Handbook of Algal Science, Technology, and Medicine*, with a strong section on the algal biofuels, in 2020.

Environmental Policy: New Directions for the Twenty-First Century 8th Edition Norman J. Vig, Michael E. Kraft, 2012-05-15. Available this summer in its Eighth Edition, Rosenbaum's classic comprehensive text once more provides definitive coverage of environmental politics and policy, lively case material, and a balanced assessment of current environmental issues. Notable revisions include a completely revamped energy chapter covering conventional energy

policy as well as a comparative examination of alternatives to current energy production Expanded discussion of current U S climate change policy with attention to the role of the states the impact of global environmental politics and emerging technologies on policy alternatives Analysis of the Obama administration s energy agenda and its profound differences from Bush administration policies and the practical difficulties of creating an effective political coalition in support of the new policy agenda Greater emphasis on executive congressional relations in the policy making cycle Examination of changes in the environmental movement with particular attention to newly emerging cleavages over energy and climate issues A thorough updating of all policy chapters including an examination of such topics as mountain top removal the emergence of Bisphenol A as an endocrine disruptor issue and the new NIMBYism New and revised tables figures and other data illustrate key environmental information while a new detailed timeline frames the initial chapter s historical narrative of evolving environmental policy

Game Theory and Applications Florian Bartholomae, Marcus Wiens, 2024-07-15 This textbook provides an overview of the fundamentals of game theory and its applications in various fields It introduces game theory as an established toolkit for the mathematical analysis and evaluation of strategic decisions Through applied exercises it introduces the basic concepts of game theory and offers students from various disciplines the opportunity to practice the concepts through in depth training The textbook addresses advanced students of economics business administration and related disciplines university graduates with basic mathematical training as well as interested readers from all fields For this it provides student friendly explanations a variety of exercises and problems and useful references to further reading The book is divided into a beginner friendly theory section in which the most important aspects are presented in a compact and clear manner and an application oriented problem section in which the readers can directly check what they have learned and find many application examples The latter can also be used as a source of inspiration for instructors

The Enigmatic Realm of **Renewable Energy Top**: Unleashing the Language is Inner Magic

In a fast-paced digital era where connections and knowledge intertwine, the enigmatic realm of language reveals its inherent magic. Its capacity to stir emotions, ignite contemplation, and catalyze profound transformations is nothing short of extraordinary. Within the captivating pages of **Renewable Energy Top** a literary masterpiece penned by way of a renowned author, readers set about a transformative journey, unlocking the secrets and untapped potential embedded within each word.
