Eco-friendly Products for Sustainable Environment Development Dr. Devidas N. Patil ,Dr. Rakesh R. Jadhav ,Dr. Apurba Saikia ,Mr. Chandan Das ,2022-09-26 Every other day we read new about a fossil recently found that shows us the traces of our ancestors We being humans and creatures of this world have always left traces of us behind But traces of this and previous century are not what we should leave for our future generations Because this plastic waste these holes in ozone will endanger the lives of people and there will be extremely bad consequences Nonrenewable energy sources are causing pollution around the world and are adding to entropy Plastic will not degrade for coming thousands of years and we are basically synthesizing things that is beyond natures ability to decompose easily All this calls for production of material that does the job and is not harmful for our environment During the old times there were no shopping bags People used to carry cloth bags in old days now paper bags are their environment friendly replacement which is not very great idea either since we are cutting down trees for that This book was written keeping in mind all the troubles caused by using products that are harmful for environment and progress of this world toward creating eco friendly products was discussed The idea of creating the products that will protect the environment and make it a better place for current and upcoming generations One of the main problems of using chemical dyes to color the clothes has made its way towards utilizing the dyes that are natural or digital alternatives Tanneries are popular for releasing chemicals and metals that are toxic for other living things and we do not even realize how much plastic waste our single shopping trip produces Fuels produced from renewable sources plastic bag alternatives and some environmentally friendly items help people save money Energy saving appliances minimize energy and utility costs while using fewer natural resources Currently most businesses prefer employing eco friendly resources to make items rather than conventional ones in order to protect the environment In addition to the fact that global warming has gotten worse since the turn of the century many businesses have started producing eco friendly goods When choosing to manufacture items some businesspeople find it quite challenging to create a sustainable atmosphere Because the business will be under pressure to develop new technologies to produce a product that is both dependable and environmentally friendly This book will give you a ride of the replacements of products harmful for environment and how their better alternatives are helping the environment get back on track *Live an Eco-Friendly Life (52 Brilliant Ideas)* Natalia Marshall,2008-03-04 52 ways to get green and clean These days everyone s talking about the plight of the planet from climate change and carbon footprints to diminishing resources and vanishing species Whether you re a committed tree hugger or someone who doesn t know a pesticide from a compost heap you re sure to find a wealth of simple yet meaningful changes that are easy to implement With ideas on everything from recycling to reducing energy consumption *Live an Eco Friendly Life* will help readers save time money and the earth all at the same time **The Entrepreneur's Playbook: 100 Business Ideas** Sándor Varga,2024 Are you ready to jump into entrepreneurship Look no further than 100 Business Ideas a
