Goldman, Paul Nadasdy, Matthew D. Turner, 2011-03-15 Political ecology and science studies have found fertile meeting ground in environmental studies While the two distinct areas of inquiry approach the environment from

different perspectives one focusing on the politics of resource access and the other on the construction and perception of knowledge their work is actually more closely aligned now than ever before Knowing Nature brings together political ecologists and science studies scholars to showcase the key points of encounter between the two fields and how this intellectual mingling creates a lively and more robust ecological framework for the study of environmental politics The contributors all actively work at the interface between these two fields and here they use empirical material to explore questions of theoretical and practical import for understanding the politics that surround nature society relations from wildlife management in the Yukon to soil fertility in Kenya In addition they examine how various environmental knowledge claims are generated packaged promoted and accepted or rejected by the different actors involved in specific cases of environmental management conservation and development Finally they ask what is at stake in the struggles surrounding environmental knowledge how such struggles shape conceptions of the environment and whose interests are served in the process

Farming for the Long Haul Michael Foley, 2019-02-01 It's all but certain that the next fifty years will bring enormous not to say cataclysmic disruptions to our present way of life World oil reserves will be exhausted within that time frame as will the lithium that powers today's most sophisticated batteries suggesting that transportation is equally imperiled And there's another even more dire limitation that is looming at current rates of erosion the world's topsoil will be gone in sixty years Fresh water sources are in jeopardy too In short the large scale agricultural and food delivery system as we know it has at most a few decades before it exhausts itself and the planet with it *Farming for the Long Haul* is about building a viable small farm economy that can withstand the economic political and climatic shock waves that the twenty first century portends It draws on the innovative work of contemporary farmers but more than that it shares the experiences of farming societies around the world that have maintained resilient agricultural systems over centuries of often turbulent change Indigenous agriculturalists peasants and traditional farmers have all created broad strategies for survival through good times and bad and many of them prospered They also developed particular techniques for managing soil water and other resources sustainably Some of these techniques have been taken up by organic agriculture and permaculture but many more of them are virtually unknown even among alternative farmers This book lays out some of these strategies and presents techniques and tools that might prove most useful to farmers today and in the uncertain future
