The 8% Solution ,2001 **Criminal Justice Policy and Planning** Wayne N. Welsh, Philip W. Harris, 2016-03-31 Unlike other textbooks on the subject Criminal Justice Policy and Planning Planned Change Fifth Edition presents a comprehensive and structured account of the process of administering planned change in the criminal justice system Welsh and Harris detail a simple yet sophisticated seven stage model which offers students and practitioners a full account of program and policy development from beginning to end The authors thoughtfully discuss the steps analyzing a problem setting goals and objectives designing the program or policy action planning implementing and monitoring evaluating outcomes and reassessing and reviewing Within these steps students focus on performing essential procedures such as conducting a systems analysis specifying an impact model identifying target populations making cost projections collecting monitoring data and performing evaluations In reviewing these steps and procedures students can develop a full appreciation for the challenges inherent in the process and understand the tools that they require to meet those challenges To provide for a greater understanding of the material the text uses a wide array of real life case studies and examples of programs and policies Examples include policies such as Restorative Justice Justice Reinvestment Stop and Frisk and the Brady Act and programs such as drug courts community based violence prevention and halfway houses By examining the successes and failures of various innovations the authors demonstrate both the ability of rational planning to make successful improvements and the tendency of unplanned change to result in undesirable outcomes The result is a powerful argument for the use of logic deliberation and collaboration in criminal justice innovations **Community Corrections** Robert D.

juvenile delinquency and youth violence The authors underscore the enormous payoff in targeting potential serious violent and chronic juvenile offenders at the earliest opportunity and provide a framework for evidence informed state juvenile justice systems the Comprehensive Strategy for Serious Violent and Chronic Juvenile Offenders This strategy recognizes first that a relatively small proportion of those who enter the juvenile justice system will prove to be serious violent or chronic offenders but that group accounts for a large proportion of overall delinquency Second this strategy builds on the fact that serious violent or chronic delinquency emerges along developmental pathways allowing earlier identification of juveniles most at risk for later serious offending A third component of this approach is effective intervention capable of reducing the recidivism of those juveniles most at risk for further delinquency This framework emphasizes an evidence based approach to reducing the recidivism of those juveniles most likely to reoffend from intake onward to probation community programs confinement and reentry American Corrections Matt DeLisi, Peter John Conis, 2013 **The Development of Persistent**

Criminality Joanne Savage, 2009-02-03 The Development of Persistent Criminality addresses one of the most pressing problems of modern criminology Why do some individuals become chronic persistent offenders Because chronic offenders are responsible for the majority of serious crimes committed understanding which individuals will become chronic offenders is an important step in helping us develop interventions This volume bridges the gap between the criminological literature which has recently focused on the existence of various criminal trajectories and the developmental psychology literature which has focused on risk factors for conduct problems and delinquency In its chapters by some of the most widely published authors in this area unite to contribute to a knowledge base which will be the next major milestone in the field of criminology The authors of this volume represent a unique gathering of international interdisciplinary social problem so that we can prevent the enormous human and economic costs associated with serious crimes these authors share their insights and findings on topics such as families and parenting poverty stressful life events social support biology and genetics early onset foster care educational programs for juvenile offenders deterrence and chronic offending among females Significant attention is paid throughout to longitudinal studies of offending Several authors also share new theoretical approaches to understanding persistence and chronicity in offending including an expansion of the conceptualization of the etiology of self control a discussion of offender resistance to social control a dynamic developmental systems approach to understanding offending in young adulthood and the application of Wikström's situational action theory to persistent offending
