

Birnbaum's United States 1989

Ride the range under starry skies, curl up by the fire in a country inn, tap your toes to a hot jazz lick, dig for clams on a snow-white beach, cruise on a paddle-wheeler from Natchez to Mobile...

"The information is up-to-date and crisply presented... the judgments knowledgeable..."

President Reagan Lou Cannon, 2008-08-04 Hailed by the New Yorker as a superlative study of a president and his presidency Lou Cannon s President Reagan remains the definitive account of our most significant presidency in the last fifty years Ronald Wilson Reagan the first actor to be elected president turned in the performance of a lifetime But that performance concealed the complexities of the man baffling most who came in contact with him Who was the man behind the makeup Only Lou Cannon who covered Reagan through his political career can tell us The keenest Reagan watcher of them all he has been the only author to reveal the nature of a man both shrewd and oblivious Based on hundreds of interviews with the president the First Lady and hundreds of the administration s major figures President Reagan takes us behind the scenes of the Oval Office Cannon leads us through all of Reagan s roles from the affable cowboy to the self styled family man from the politician who denounced big government to the president who created the largest peace time deficit from the statesman who reviled the Soviet government to the Great Communicator who helped end the cold war *Dioxins and Health* A. Schecter, 2013-11-11 This book originated in a series of cross disciplinary conversations in the years 1984 1990 between the editor who is a physician researcher involved in clinical and laboratory research and a dioxin toxicologist During the years in which the conversations took place an extraordinary amount of new scientific literature was published related to dioxins

defined for purposes of this text as the chlorinated dibenzo p dioxins dibenzofurans polychlorinated biphenyls PCBs and other compounds that are structurally and toxicologically similar to 2,3,7,8-tetrachlorodibenzo p dioxin (2,3,7,8-TCDD) the most extensively studied and most toxic of this group of chemicals. Dioxins also began to interest not only chemists and toxicologists but also specialists from diverse disciplines such as wildlife and environmental science, immunology, neuroscience, public health, epidemiology, medicine, government, law, sociology, and journalism. Specialists from such varied disciplines while familiar with their own literature frequently did not have time to follow the dioxin literature outside their specialty area. In addition, each specialty had unique knowledge, methods, and perspectives. Cross-disciplinary conversation was necessary but all too frequently specialists from the various disciplines did not speak the same language, resulting in misunderstanding.

The Power of Collegiality Nadja Bieletzki, 2017-12-16 Nadja Bieletzki explores how university presidents lead universities. She provides insights into the upper echelons of higher education management and focuses especially on university presidents in Germany. Special attention is given to the career background of university presidents and the way they conduct reform projects. Based on the results from semi-structured expert interviews and their qualitative analysis, the author shows that university presidents do not use all their formal power although their position has been strengthened by law. This can be explained by the collegial characteristics of universities which drive and restrict presidential actions. Nadja Bieletzki was awarded the Ulrich Teichler Prize for Excellent Dissertations 2016.
